- 2 year warranty

The Lindy USB Type C to HDMI® 8K Converter is a high performance solution, which allows users to easily add external video capabilities to a computer featuring the USB Type C port with support for DisplayPort 1.4 Alternate Mode. It supports video resolutions of 8K 7680x4320@60Hz and 4K240Hz*, making it the ideal tool for 8K game streaming or high resolution 8K video editing. Additional support for High-Dynamic Range ensures video content can be seen with enhanced brightness, superior contrasts and a much wider colour gamut, for more lifelike colour. HDCP 2.2 ensures issue-free playback of 8K Ultra HD movies and other 8K content. For best performance the use of Ultra High Speed HDMI® Cables is recommended.

The converter is powered by the USB Bus, therefore no external power supply is needed, saving space and time when connecting. The Type C connectors' reversible design means a connection can be found regardless of which way the cable is inserted into the port of a laptop, notebook or Macbook. With Plug and Play installation, this converter can be installed with minimum fuss, perfect for both professional and first time users.
