Progress® MOVEit®

MOVEit® Cloud
Managed File Transfer as a Service

DATA SHEET

KEY BENEFITS

- ✓ **Minimizes time spent managing software and security updates**

- ✓ **Integrates with in-house applications and services**

- ✓ **Reduces the risk of data loss and non-compliance**

- ✓ **Centralizes file transfer management and visibility**

- ✓ **Transfers sensitive information securely**

- ✓ **Aids secure end-user collaboration and employee file-sharing**

Progress® MOVEit® Cloud is a Managed File Transfer as a service in the Azure Cloud. It enables the consolidation of all file transfer activities into one system for broad visibility and control over business-critical file transfers.

The MOVEit Cloud solution provides security, centralized access controls, file encryption and activity tracking to help you achieve operational reliability and compliance with SLAs, internal governance and regulatory requirements.
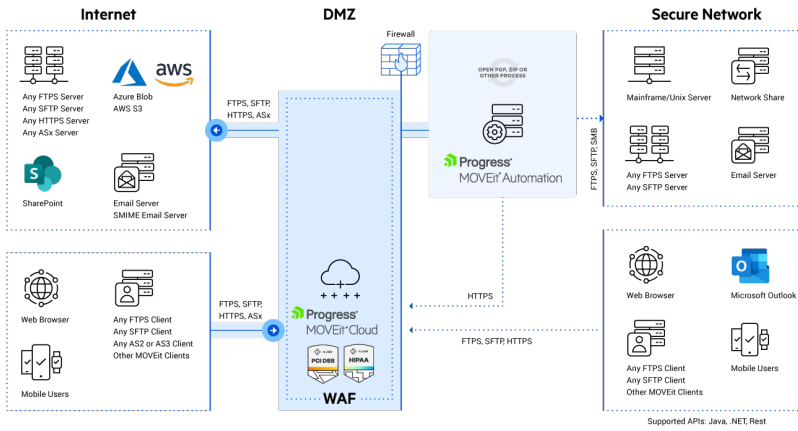

The MOVEit Cloud MFT software is an auditor-certified HIPAA, HITECH and HIPAA Omnibus-compliant solution that is GDPR-ready to help you meet industry regulations. Combined with a PCI DSS 4.0, SOC 2 Type 2 and ISO 27001 certified feature set, it drastically reduces the scope of compliance audits with the expert-managed, common security framework of Progress.

Secure File Transfers with Broad Visibility

In an era of high-visibility security violations, MOVEit Cloud software helps protect your most valuable asset—your data—by incorporating essential security measures for cloud services. These include:

- Broad encryption, including storage encryption ("data at rest")
- Web application firewall (WAF)
- Non-repudiation
- Intrusion detection and vulnerability scans
- Control over user access and permissions
- Centralized user authentication

- Single sign-on via SAML 2.0 integration to IdP systems
- Separation of administrator duties
- Audit trails of all activities
- Separate encryption keys for each customer and each file
- User authorization for access to contents and files

G2 Leader WINTER 2025

Internet — **DMZ** — **Secure Network**
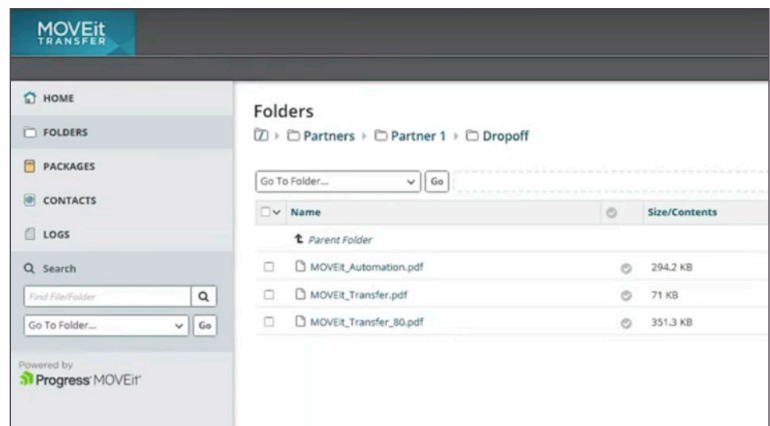

GDPR READY

Organizations that process the personal data of EU residents can leverage MOVEit Cloud software to help them uphold compliance with GDPR.

HIPAA COMPLIANCE

MOVEit Cloud software is auditor-certified for compliance with Health Insurance Portability and Accountability Act (HIPAA).

PCI 4.0-CERTIFIED

Companies that store, process or transmit sensitive cardholder data can incorporate the Progress PCI Report on Compliance (RoC) for the MOVEit Cloud service in their third-party compliance assessments.

SOC 2 TYPE 2

MOVEit Cloud software has obtained the SOC 2 designation from a third-party auditor as evidence of sound management and security controls.

PROFESSIONALLY MANAGED BY EXPERTS

Save time on system management and migrations.

ROBUST SECURITY

Stay current on the latest security updates and layers of defense, including access control, integrity checking, PEN testing and more. Single sign-on via SAML 2.0 integration is available to Identity Provider systems.

RELIABILITY, ELASTICITY AND RAPID DEPLOYMENT

Quickly satisfy peaks in demand with rapid deployment and increased elasticity with managed multi-node scaling.

TRUSTED BY THE MOST DATA-SENSITIVE INDUSTRIES

MOVEit Cloud software is delivered by Progress, a decades-long industry leader in the file transfer space. Customers from healthcare, finance and other data-sensitive industries rely on Progress' proven expertise and 24/7 support.

DATACENTER AND MANAGED OPERATIONS

- SSAE 16 SOC 2 Type 2 report available
- EU-US Safe Harbor certification available
- EU-hosted datacenters for EU-based customers
- Software upgrades managed by the Progress Cloud Operations team
- 24x7x365 active monitoring of the system with automated alerts

SECURE SYSTEM ARCHITECTURE

- Professional-grade security controls, multiple layers of defense and FIPS-validated cryptography enable compliance with requirements and IT policy
- Hosting staff has no access to the contents of your files
- Multi-tenant software with separate encryption keys for each customer and each file
- Intrusion detection and regular vulnerability scans
- Local high availability provided by load-balanced web farms

OFFSITE BACKUP AND DISASTER RECOVERY

- Continuous replication from primary datacenters to geographically distinct failover datacenters
- Nightly configuration backups
- Easily accessible offsite data backup

REPORTING, LOGGING AND RETENTION

- Usage reports on bandwidth and storage are available
- Billback support tracks usage consumed by the user group so you can allocate costs internally
- System setting log archives are available with 30 days of default online audit log retention
- Expired audit logs may be automatically archived on the system or downloaded in CSV or XML format

AVAILABLE ON DEMAND

- Free limited-time evaluation with technical support is available
- New subscriptions and upgrades are provisioned in hours
- System resources are elastic, with more capacity for users, files or bandwidth instantly provisioned to customers
- Security and compliance questions are handled by our expert team
