Intelligent Audio

Experience professional-grade audio in a sleek, portable design. As the world's first earbuds to achieve Microsoft Teams Open Office certification¹, Dell earbuds deliver headset-level audio input with an AI-based noise-cancelling mic, solving portability and comfort challenges for modern workstyles.

Flawless Audio. Anywhere.

Immerse in flawless audio with Adaptive ANC, Enhanced Transparency Mode, all-day comfort, and IP54 dust and water resistance for versatile listening.

Seamless Controls and Connections

Manage your audio effortlessly with intuitive touch controls. Experience faster, more reliable connections with advanced Bluetooth 5.3 technology and simplified device pairing through Dell Pair.

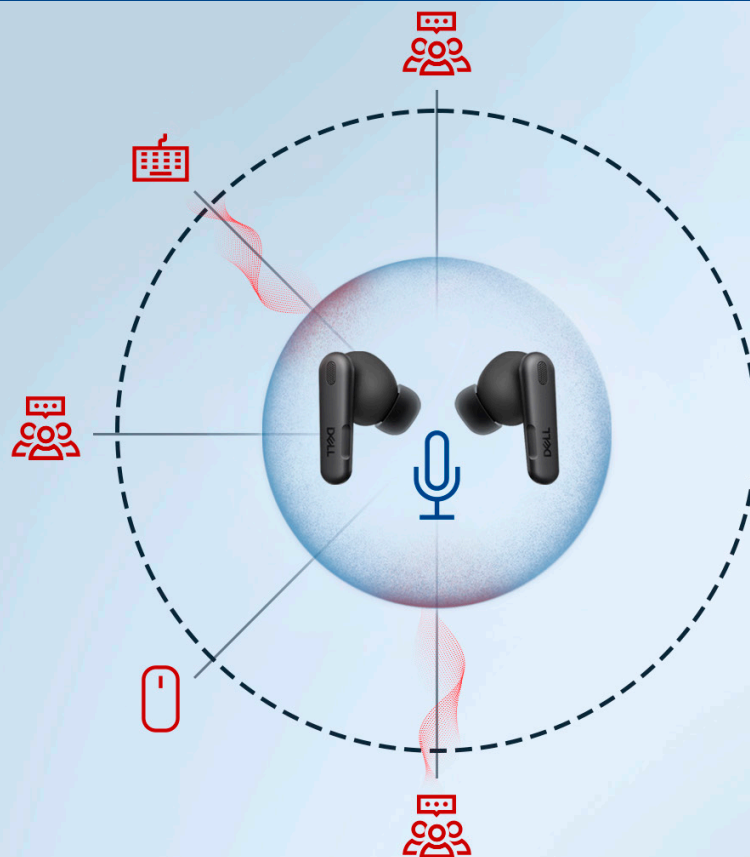

Personalized Sound and Control

Personalize audio settings with the Dell Audio App on your mobile phone and Dell Display and Peripheral Manager on your Windows PC.

¹Based on internal analysis of publicly available data, July 2025

Engineered for voice precision

Certified for Microsoft Teams (Open Office) and Zoom, and compatible with other major UC platforms. Microsoft Teams Open Office certification ensures the earbud's microphone meets the highest standard, suppressing surrounding noise and conversations from all directions—delivering premium performance in open offices.

Engineered for Clarity

Trained on over 500 million voice and noise samples, our AI-based microphone is engineered to filter out background noise, focusing solely on your voice. This advanced training allows it to adapt seamlessly to real-world environments.

Immersive audio, natural transparency

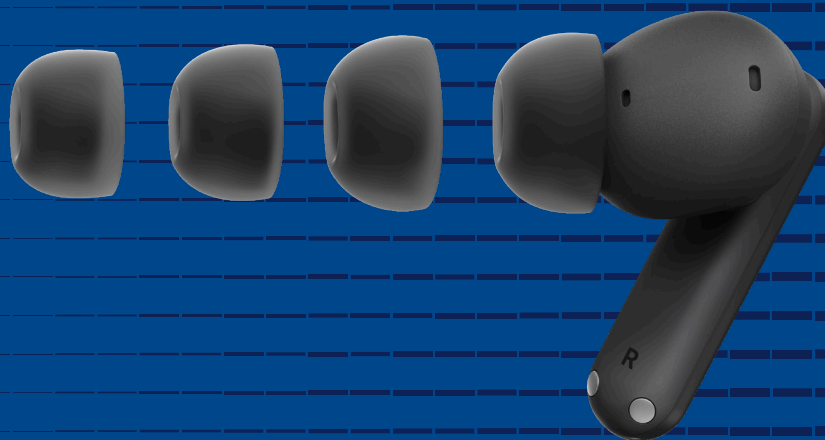

Adaptive ANC intelligently adjusts to your environment, delivering the perfect level of noise cancellation for uninterrupted focus. Conversely, Enhanced Transparency Mode offers natural, lifelike sound, keeping you aware of your surroundings without compromising your listening experience.

Enhanced Transparency Mode vs. Standard Transparency Mode

Unlike standard transparency modes that may produce robotic, processed audio, our Enhanced Transparency Mode delivers natural, lifelike sound, allowing for a more seamless and comfortable awareness of your surroundings.

Tailored fit, easy controls

Find your perfect fit with four ear tip sizes (XS, S, M, L) designed for all-day comfort and effective noise isolation. With IP54 dust and water resistance, these earbuds are built to handle your day, wherever it takes you.

Effortlessly take control with intuitive touch gestures—answer or hang up calls, adjust volume with a swipe, mute your mic, and seamlessly toggle between Adaptive ANC, Enhanced Transparency Mode, and ANC off.

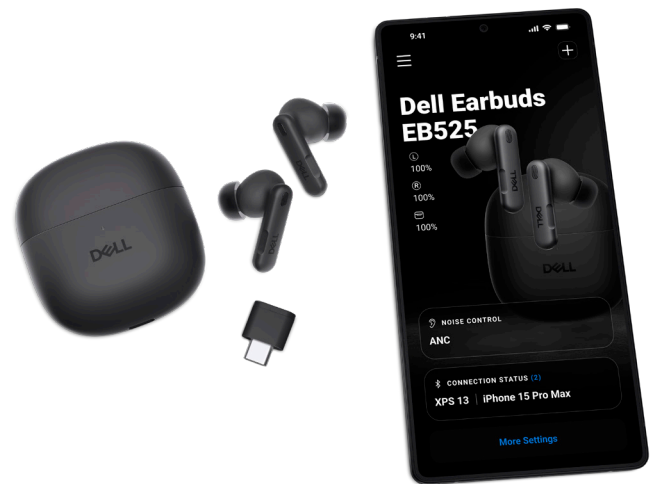

Personalize your settings

Dell Audio App

Take full control of your audio with the Dell Audio Mobile App, offering personalized settings, battery status, and the 'Find My Earbuds' feature².

Dell Pair and Bluetooth 5.3

Experience faster, more reliable connections with Bluetooth 5.3 and instantly pair your earbuds to Dell PCs using Dell Pair for a truly integrated experience.

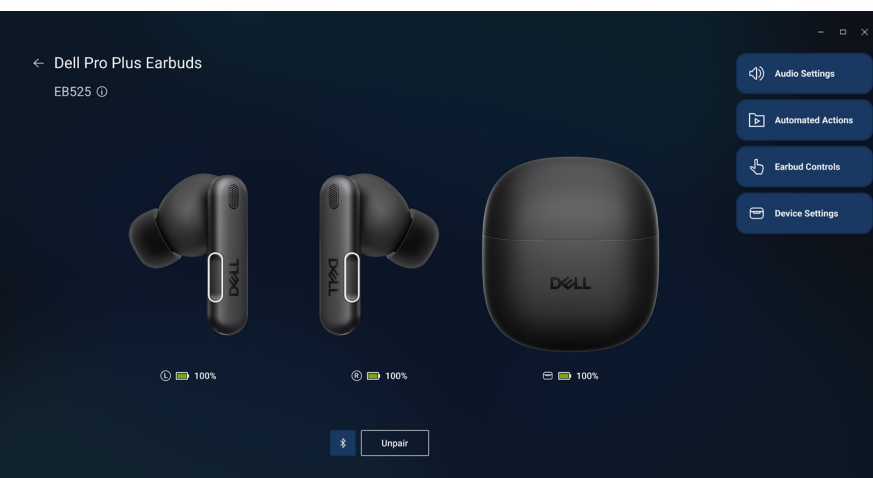

For desktops, experience our singular, innovative application to optimize the performance of your entire Dell PC workspace with Dell Display and Peripheral Manager

Customize your audio experience

This app allows users to adjust the device settings and customize audio preferences by assigning preset modes such as Speech, Bass Boost, and Treble Boost. Additionally, users can create personalized audio presets using the Audio Equalizer. Users can customize earbud controls for calls and multimedia use and receive the latest firmware updates.

More manageable

Save time and boost IT efficiency with the Dell Device Management Console to manage your Dell peripheral fleet at scale, from a single cloud-based console. Discover expanded Command Line Interface features from Dell Display and Peripheral Manager.

² Feature is currently NOT supported on Mobile Devices that have Dell Audio App downloaded from China's app stores like Tencent Store.

| FEATURE | TECHNICAL SPECIFICATION |
|--------------------------------------------|----------------------------------------------------------------------|
| DRIVER SIZE | 11.6mm |
| EARPIECE SENSITIVITY | 106 ± 2dB @ 1kHz/1mW |
| SIGNAL TO NOISE RATIO (SNR) | 66dB |
| MICROPHONE FREQUENCY RESPONSE | 100Hz - 8kHz |
