

## Laptop holder - Product overview

Raise your laptop screen to the right height and distance. With a laptop stand, you raise the laptop screen, reduce the viewing distance and prevent unnecessary bending of your neck and back "into your screen". You automatically adopt a healthier posture and work much more productively. You can choose the best laptop holder for you based on the following criteria:

- What type and size is my laptop?
- Do I also work with a tablet?
- Do I want to use an integrated document holder?
- Is sustainability important to me?
- Which material do I prefer?
- How many height settings do I need?

With the following selection, you are guaranteed to find the optimal laptop stand for you.

**DD** | DUTCH  
DESIGN

Adjust your laptop screen to the right height, angle and distance so that you automatically adopt an ergonomically correct posture.

1. **The distance** between your eyes and the screen should be approx. 50-80 cm (about an arm's length), depending on the screen size and resolution. Adjust the distance of your screen.
2. **The angle** of your line of vision to the centre of the screen should be approx.  $35^\circ$ , so adjust the height of your screen as well.

## Legal requirements

Without assistive devices, the laptop is not suitable for prolonged use. If the laptop is used for more than one hour at a time, aids are required to meet legal requirements and practice guidelines. To be able to work comfortably and productively on the laptop for a long time, a laptop holder, an external mouse and an external keyboard are therefore indispensable. If you use an external monitor and position the laptop screen at the same height as it, both can also be used as a dual screen.

More information about the laptop stands.

Item name Item number	Image	Laptop Screen size in inches	• Dimensions (mm) • Weight (g) • Height adjustment range (mm)	Number of height adjustments	Material	Colour	Unique Selling Points	Cooling: • Low • Medium • High	Integrated Document holder	Mobile (Foldable into a narrow/compact size)
