How to install and connect

- To connect the Go 2 via 3G/4G you will need an additional SIM Card and data plan that is not included
- The Go 2 can also be connected through a 2.4Ghz Wi-Fi network if required
- Installation of the camera is easy with the provided mount and screw kit
- The Go 2 includes a microSD card slot for local storage. Cloud storage is also available through an Arlo Secure subscription

TOP TIP

Save money on your energy bills and never worry about charging your camera by purchasing the Arlo Solar Panel for continuous re-charging.

Why is the Arlo Go 2 the best 3G/4G security camera?

- Both 3G/4G & Wi-Fi connectivity means you can cover every location
- The Go 2 includes a spotlight and siren to deter intruders
- An Arlo Secure subscription gives you access to industry-leading detection features and secure cloud storage

Help your customer build their home security system
