

## APC 2-Post Mounting Kit for Smart-UPS and Symmetra Frequently Asked Questions

### Summary

The APC 2-Post Mounting Kit for Smart-UPS and Symmetra (AP9625) was created in order to provide a means to mount certain Smart-UPS models, all Symmetra RM models and the 208/120V step-down transformers in standard 2-post racks. 2-Post racks are common in wiring closets and the need to provide back-up power in these environments has increased with the application of VoIP (voice over internet protocol). **This kit replaces the older SYOPT6, SYOPT7 and SYOPT8 kits.**

### Compatibility

Product Line	Model(s)	Comments
Smart-UPS	SMT2200RM2U, SMT3000RM2U, SMT3000RMT2U, SMT2200RMi2U, SMT3000RMi2U, SUA2200RM2U, SUA3000RM2U, SUA3000RMT2U, SUA2200RMi2U, SUA3000RMi2U, SUA5000RMT5U, SUA5000RMi5U	Note that the 2200/3000VA models also have a set back ear position (approx 5 inches from front) that may be used to mount in a 2-post rack. However due to the weight of these units, the AP9625 kit is recommended.
Smart-UPS XL	SMX2000RMLV2U, SMX2200RMLV2U, SMX3000RMLV2U, SMX2200RMHV2U, SMX3000RMHV2U, SMX120RMBP2U, SUA2200RML3U, SUA3000RML3U, SUA2200RMLi3U, SUA3000RMLi3U, SUA48RMLBP3U	All of these models require the AP9625 for mounting in a 2-post rack. Note the 2200/3000VA Smart-UPS 5U's provide an optimized form factor for 2-post mounting and do not require the AP9625 kit.
Smart-UPS RT	SURTA3000RML, SURT(D)3000XLi, SURT(D)5000XLi, SURT(D)3000XLT, SURT5000XLT, SURT192RMLBP	These models require the AP9625 for mounting in a 2-post rack. Rack mount ears are included in AP9625 for the 3U SURT models.
Symmetra	SYH2K6RMT-, SYH4K6RMT-, SY6K6RMT-, SY8K12RMT-, SY12K12RMT-, SYH2K6RMi, SYH4K6RMi, SY6K6RMi, SY8K12RMi, SY12K12RMi	Note that one AP9625 kit is needed for each UPS and transformer.

Product Line	Model(s)	Comments
Step-down Transformers	AP9621, AP9626, AP9627, AP9628, SUTF2, SUTF3, SYTF2, SYTF3, SURT005	Compatible with all 2U step-down transformers.

Note that Smart-UPS 750-1500 2U rack mounts **do not** require the AP9625 to be mounted in a 2-post rack. Also the 2200/3000 5U Smart-UPS units provide a form factor that is optimized for 2-post rack installations and consequently do not require any additional mounting hardware. Customers that desire to “flush mount” a Smart-UPS unit with the front of the 2-post rack should consider the **AR8422** fixed shelf for support.
