
Product Information

Overview

Available in a selection of metallic finishes to match your iPhone. You can use it to charge and sync any iPhone that has a Lightning connector. Your iPhone sits upright in the dock as it syncs or charges, so it's ideal for a desk or countertop. Even when your iPhone is in an Apple-designed case, it's easy to dock. And you can unlock iPhone or use Touch ID without having to remove it from the dock.

Here are some ways you can use the iPhone Lightning Dock:

Connect the dock to your computer with the USB cable (included with your iPhone) to sync iPhone and charge its battery.

Connect the dock to an electrical outlet using the Apple USB Power Adapter (included with your iPhone) to charge the battery.

Place your iPhone in the dock and enjoy clear audio during speakerphone calls. Connect powered speakers or any headphones with a 3.5 mm audio jack to the dock to listen to music while you sync and charge.
