## Headset Wired

Article number: 4570861

The Articon headset provides high quality sound of microphone and speakers. It is wired, has a USB-A port and is easy to use without installation due to the plug & play feature. The cable is 3.0 m long and the single-sided cable routing ensures a comfortable wearing experience. The 3.5 mm jack plug connects to the extension cable with USB-A-connector with integrated remote control. The headset supports Windows, Linux, Mac and PS4 and is compatible with all popular apps and programs (MS Teams, Cisco Jabber, Cisco WebEx, Skype, etc.). Over-ear pads from synthetic leather and a padded adjustable headband make these the perfect fit for any head or ear size. It is ideal for use in the office, in home office or for gaming, as background noise almost disappears. The flexible microphone arm can be individually adjusted and the remote control integrated in the cable allows volume control, sound off as well as muting. The foldable ear cups also allow the headset to be stored in a space-saving manner.

- Binaural and over-ear
- Padded infinitely adjustable headband
- Corded (3.0 m)
- USB-A port
- flexible microphone arm
- integrated remote control
- Black
