

Weather Station

00176596 WLAN Weather Station with App, Outdoor Sensor, Thermometer/Hygrometer/Baro.

Highlightstext:

- With the WLAN weather station, check what's happening with the weather anytime and anywhere and conveniently access detailed weather data via the app or voice control
- The weather station for smart homes: simply connect the wireless weather station with the WLAN and access accurate weather data the smart way: in the app, via voice control or on the weather station itself
- Whether it be the sofa or the sun lounger: with the Hama Smart Home app and WLAN weather station, you have your eye on the weather at all times, no matter where you are
- Accurate weather data: with a thermometer, hygrometer and barometer, you can document comprehensive readings for indoors and out that are specific to your location
- In detail and local: with the weather forecast, you will become a weather expert. You know exactly what the weather is locally, how it's going to change and, thanks to the app, how it was during a specific period
- Step by step to the Smart Home: with the Hama Smart Home app, you can expand and network your smart home with any number of Hama Smart Home products, such as a fan that starts up automatically when the outdoor temperature is high
- Whether it be Amazon Alexa or Google Assistant: conveniently request information from the smart weather station using voice commands and activate scenes
- Our WiFi weather station works without any gateway (hub): you don't need an additional device, and you save on extra costs since the weather station establishes a direct WiFi connection with the router
- The weather forecast is displayed using six symbols: sunny, slightly cloudy, overcast, rain, heavy rain and snowfall
- Shows the current phases of the moon - from new moon to waning moon
- Outdoor sensor with temperature and air humidity display
- Simple installation on your own WiFi network: since no hub is required, your devices can be set up in just a few minutes
- Can be set via the Hama Smart Home app or directly on the weather station
- High compatibility: works with Amazon Alexa, Google Assistant, iOS and Android. Can also be connected to all Alex and Google Assistant-compatible smart home products from other manufacturers
- Create scenes and automation with other Smart Home products: e.g. in the event of frost, the heating control will increase the temperature, while if the atmosphere gets too damp indoors, you will receive a reminder to ventilate the room
- Temperature and ambient humidity measurement indoors and outdoors
- Trend display for ambient humidity and temperature: rising, steady, falling
- All captured data can be tracked in the app, so the weather changes can be traced over several months or years, for example
- Display of the min. and max. values on the Smart Home weather station
- Time (automatic time adjustment via WiFi), date and weekday display
- Weekday abbreviations in 7 languages
- Time display in 12 and 24-hour format, time zone can be set manually if it is different from the WiFi time
- Frost indicator (snowflake): -1 - +3°C
- Calendar up to 2099
- 4-stage backlight
- Also works with batteries (without WiFi function)
- Toggle for: °C and °F
- Your data is stored exclusively on German servers

System Requirements:

- Operating system: Android 4.4 and iOS 8.0 or later

Note for Consumers:

Amazon Alexa:

the required Alexa skill "Hama Smart Home" must be activated in the Alexa app. The user account for the Hama Smart Home app is then

Weather Station

00176596 WLAN Weather Station with App, Outdoor Sensor, Thermometer/Hygrometer/Baro.

connected to Alexa.

Google Assistant:

the "Hama Smart Home" service must be activated in the Google Home app for this. The user account for the Hama Smart Home app is then connected to Google.

Technical characteristics:

- Backlight: Colour Display
- Colour: Black
- Product Division: Home & Living
- Shade of colour: Black
- Signal Transmission: 2.4 GHz
- Compatible operating systems: Android 4.4/Apple iOS 8.0
- Display outdoor sensor: Hygrometer, Thermometer
- Frequency: 433 MHz
- Radiated max. transmission power: 100
- Range to Radio Outdoor Sensor: 60 m
- Additional Functions: Battery Capacity Indicator, Likelihood of Rain, Moonphase Display, Outdoor Sensor, Trend Display for Air Humidity, Trend Display for Atmospheric Pressure, Trendanzeige for Temperature, Weather Forecast, Weather Warning
- Display: Date
- Display: Digital
- Hygrometer inside: 20-95%
- Hygrometer outside: 20-95%
- Measurement Range (inside): -20°C to +60°C
- Measurement Range (outside): -40°C up to +70°C
- Operating Mode: Wireless
- Voice Assistant: Amazon Alexa/Apple Siri/Apple Siri (Shortcuts)
- Watch Function: Yes (with 12/24)
- Width x Depth x Height: 3 x 16.5 x 12.8
- Number of Batteries (Outdoor Sensor): 2
- Number of Batteries (Station): 2
- Type of Battery (Station): AA Mignon
- Type of Battery Outside Sensor: AA Mignon
- App Control: Hama Smart Home
- Recommended Use: Home Assistant

Delivery:

- 1 WLAN weather station
- 1 power supply unit
- 1 outdoor sensor
- 1 quick reference guide
