

PoE Tester - Power over Ethernet

Part No.: 60197

Description

- Quickly test an RJ-45 port for Power over Ethernet
- Tests for IEEE 802.3af/at PoE voltage
- Mid-span, End-span and 4-pair LED identification
- Compact Plug and Play design
- 2 Year Warranty

The LINDY Power over Ethernet (PoE) Tester is ideal for quickly identifying if an RJ-45 outlet has PoE voltage.

Simply connect the tester and the relevant LED will show depending on which type of PoE system is used.

It can detect if the PoE is End-span, Mid-span or 4-pair by identifying the type of PSE (Power Source Equipment) used.

Technical details

- Two LEDs indicate the type of PSE (power source equipment)
- Identifies IEEE 802.3af and IEEE 802.3at PoE plus standard
- Able to detect End-span PoE switch, Mid-span PoE injector or 4-pair 60-watt PoE injector
