
Product Information

Overview

The Smart Cover for iPad mini is constructed from a single piece of polyurethane to protect the front of your device. It automatically wakes your iPad when opened and puts it to sleep when closed. You can easily fold the Smart Cover into different positions to create a stand for reading, viewing, typing, or making FaceTime calls. And it's easy to remove, so you can snap it on and off whenever you want.

What's in the Box

iPad mini Smart Cover

Compatibility
