# mimecast™

## Mimecast Managed Implementation Plus.

Extend your Mimecast implementation with our comprehensive implementation service offering!

With our exclusive service for an advanced Mimecast implementation, you can get the most out of your Mimecast solution and take your email security to the next level. Rely on our expertise and benefit from seamless integration and efficient use.

Our service offerings include detailed planning, configuration, and implementation of Mimecast features that go beyond basic implementation. We will help you get the most out of your email security, archiving, privacy, and compliance.

As part of our range of services, we will:

- ✓ Conduct an in-depth analysis of your existing email infrastructure to identify the optimal configurations for your advanced Mimecast solution.
- ✓ Support the implementation of additional Mimecast features such as advanced threat protection, data loss prevention (DLP), or advanced archiving.
- ✓ Support the configuration of security policies and filtering rules according to your specific requirements and compliance requirements.
- ✓ Provide custom training and guidance to train your employees on how to use Mimecast's advanced features and realize their full potential.

End-to-End cloud platform-  
reduces costs and complexity

100% Availability of  
E-mails
