

Free up your IT team for bigger things.

Even the smallest IT teams are tasked with big picture goals. Yet the daily grind of putting out fires often gets in the way of their progress. With remote, real-time access to all your Lenovo ThinkSmart devices, ThinkSmart Manager gives you back the time to make your IT team's biggest ideas a reality.

ThinkSmart MANAGER

ThinkSmart Manager from Lenovo provides a single view of all devices in your ThinkSmart fleet.* A new, user-friendly dashboard gives IT teams a quicker at-a-glance view of their organization with an overall status report, Top 5 issues list, and more.

HASSLE-FREE PROCESS

- Remotely set up new and legacy devices from anywhere with cloud access
- Leverage a single console to remotely deploy, manage, configure, update, and resolve issues

REAL-TIME ACCESS

- See real-time status by device, including “in meeting” status so you can avoid pushing updates to a device while it is in use
- Fix problems before they are reported using live at-a-glance issues list

SMARTER OPERATIONS

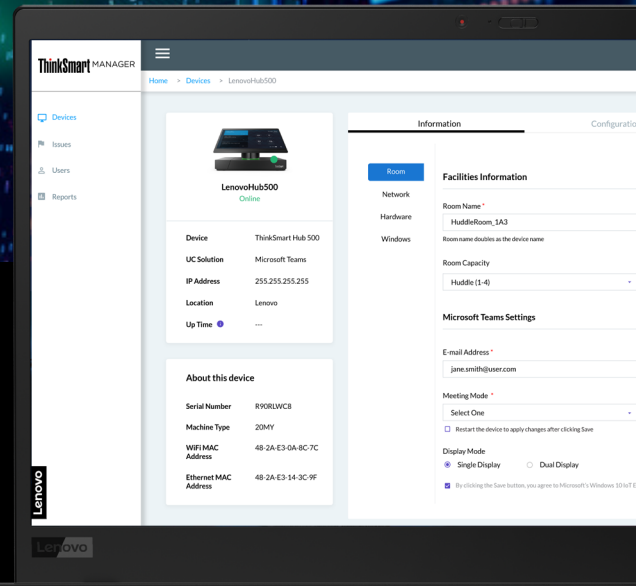

- Streamline actions across multiple devices with “apply all” option
- Download CSV lists of all devices and users and generate reports on device issues and trends
- Remotely configure Microsoft Teams Rooms accounts from the console

ELEVATED SECURITY

- Protect data with hardware-based TPM 2.0 chip
- Elevate overall device security with BIOS/SVP change management
- Remotely enable/disable USB Boot and USB port blocking
