PROJECTOR
PS501W

Key **Features**

Fit For Classrooms of All Sizes | Interactive module compatible | Instant Activation Upon Signal Detection | Integrated Power Source | Bright Images in Any Environment

Product **Description**

The PS501W is a high brightness WXGA short throw projector for education. With the ability to project 100" images from a distance of 106cm from any projection surface, the projector is flexible enough to fit any classroom design and keeps the presenter clear of the projection beam. For times when lights in the classroom must be kept on, a high brightness of 3,500 ANSI Lumens ensures that images remain clear and detailed. ViewSonic exclusive SuperColor™ technology offers a true-to-life color accuracy for projected images. The energy-saving SuperEco mode reduces power consumption and extends lamp life to a lengthy 15,000 hours. In addition, PS501W is compatible with the optional PJ-vTouch-10S interactive module, which allows you to use a stylus or finger touch to annotate on projected images – turning class into an engaging interactive teaching environment.
