Foxit

eSign
Data Sheet

Legally-binding e-signature service to prepare, send, sign, and track agreements.

Overview

Foxit empowers organizations of all sizes and individuals to get documents signed and move on with their day. Our flexible solution comes in two plans. Simple eSigning and payment collection tools are yours with the Foxit eSign Essentials plan. Or empower teams with template sharing, custom branding, and user management tools with Foxit eSign Business. Need more compliance, access to integrations, or advanced workflow management? You can get all that and more by adding whichever modules you need to your Foxit eSign Business plan anytime. Work is hard enough. Let's keep eSigning simple.

Key Features

Simple User-Friendly Interface

Intuitive Design

Our easy-to-use interface is designed for simplicity and quick adoption. Finding, sharing, editing, tracking, and more can be learned by most users in a matter of minutes.

Guided Signing

Signers are provided with step-by-step instructions for a seamless signing experience. From the time that they have verified their identity to completed document submission, signers are shown were to sign and what to do with simple on screen prompts.

Customizable Templates

Quickly create reusable templates for frequently used documents and share them across your team for easy access. The drag and drop template builder is simple to use yet provides everything needed for even the most complex document signing workflows.

Advanced Document Security

End-to-End Encryption

Ensures documents are protected throughout the signing process.

Signature Certificates

Ensure the legitimacy of your signed documents thanks to detailed signature certificates that verify the signers identity.

Audit Trails

Detailed logs of all actions taken on documents for transparency and accountability.

Compliance

Meet global standards including eIDAS, HIPAA, FERPA, FINRA, UETA, ESIGN Act, and more with easy to manage compliances.

Advanced Document Workflows

Bulk Sending

One document, one recipient list, and send. Everyone gets their own copy, and they are all tracked seamlessly in Foxit eSign. You can even map fields from a spreadsheet to fields on your document to personalize each copy for each signer.

Bulk Signing

Some executives spend hours each week just opening, printing, and signing documents one at a time. Imagine if you could just open all of them at one time, sign your name once and have it automatically applied to all the documents.

Signing Order

Getting a document signed by one person is one thing. But what if you need it to be signed by multiple people? What if you need it signed in a specific order? Get documents signed at the correct time and by the correct person with Foxit eSign signing order.

Online Forms

Share your agreement forms on your website or in your apps making it even simpler for your customers to sign up and pay for services.

Seamless Integrations

Productivity Tools

Integrate Foxit eSign with Microsoft Office 365, Google Workspace, Zapier, Teams, Dynamics, and more. Streamline your workflows with automated process to send, update, sign, track, and more across the applications that you are already using.

Foxit for Salesforce | Document Generation and eSign

Change the way you document in Salesforce. Incredible document generation capabilities combined with eSignature workflows and Salesforce Flows automations take the work out of your document workflows. *Additional fees apply.

APIs

Create worldclass eSignature and document workflow solutions with the award winning Foxit eSign API. This powerful integration comes in 7 developer languages and with complete developer support. *Additional fees apply.

Mobile Accessibility

Cross-Platform Support

Our responsive platform works on desktops, tablets, and smartphones to ensure you access to the documents you need, were and when you need them.

Mobile Application

Foxit eSign is also available as an app for Apple or Android devices. The mobile application will allow you to easily create documents and request signatures while on the go.

Mobile-Friendly Signer Interface

Once the document is sent for signing, the recipient will be able to easily follow the document instructions and sign the agreement from any device. Foxit eSign is optimized for signing documents on-the-go.

Benefits

Enhanced Productivity

Faster Transactions

Send and eSign documents in seconds, not days. Digital transactions on Foxit eSign are instant. See all of your document statuses in real team.

No More Filing

You can go ahead and stop ordering filing boxes and cabinets. No more ink, paper, toners, and replacement printers. No need to store expensive cases of paper files for years to come. Plus, your team can focus on other tasks.

Automated Workflows

Reduce manual processes and data entry errors with advanced document workflows from Foxit eSign. Automating document reminders means that nobody gets missed. Merging the correct data from your database to a unique customer specific document has never been simpler.

Cost Savings

Document Storage and Supplies

Businesses save big money when switching from a traditional paper-based document flow to Foxit eSign. You will no longer need to constantly order reems of paper, printer cartridges and toners, filing cabinets and folders, or a space to keep it all in.

Operational Efficiency

Eliminate the slow and tedious task of manually filing documents. With Foxit eSign your documents are securely stored in the cloud or can be stored remotely. In either case, it is done automatically and keeps your documents easy to find whenever and wherever you need them.

Improved Customer Experience

Faster Deal Closures

Electronic signatures can be completed in minutes. Paper methods can take days or weeks to complete. Individuals are 75% more likely to eSign vs traditional paper methods thanks to the convenience and speed of the digital signature process.

Convenient Signing

Giving your clients the ability to sign documents anytime, anywhere, and from any device making the whole process more convenient for them.

Robust Compliance

Legal Validity

Foxit eSign provides electronic signatures that meat or exceed compliances including ESIGN and 21 CFR Type 11. These compliances ensure that documents signed with Foxit eSign are legally binding, secure, and enforceable by law.

Regulatory Adherence

Foxit eSign offers a full suite of compliances to meet the rigorous regulations of your industry. Foxit eSign compliances include HIPAA, FINRA, CCPA, FERPA, eIDAS, GDPR, ESIGN, UETA, and 21 CFR Type 11.
