## Gigabit Media Converter SFP

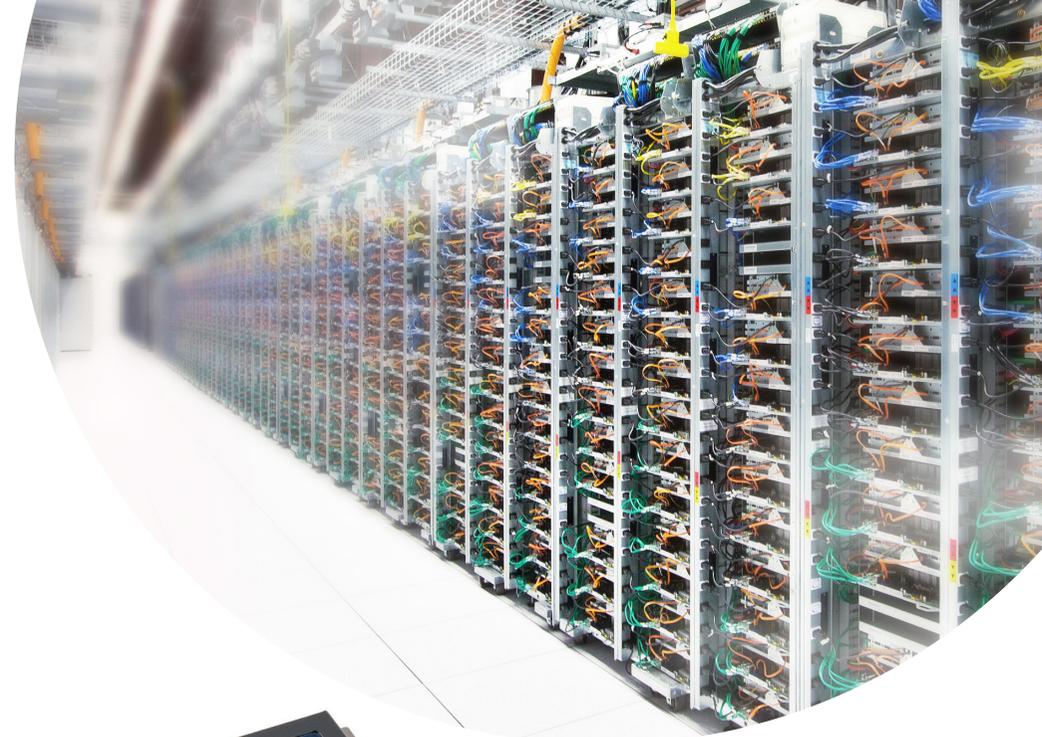

Article overview: 4055339

Media converters are used to connect networks with different media (copper or fibre optics). The newest generation of converters supports dual-rate, letting you connect both 100 Mbps and 1000 Mbps devices to fibre optic cables. These converters automatically detect and adjust the speeds of copper as well as fibre optic cables. This module supports 9 kB jumbo frames and Dual Rate Speed, and comes with a Link Alarm feature to indicate signal interruptions.

- Modular connection
- SFP and RJ45 connectors
- 10/100/1000 Mb/s
- Stand-alone module

### Specifications

Product type	Media converter
Data transfer rate	1000 Mb/s
Port 1	RJ45
Port 2	SFP
Range	Depending on SFP module
Fibre standard	Depending on SFP module
Includes	Power supply
