1. Ready For wireless connection is supported with TVs that support Android smartphone screen mirroring (Miracast) only. Ready For wired connection supported with TVs or monitors that have HDMI port or USB-C video-in port; Video-enabled USB-C cable or USB-C-to-HDMI adaptor required. **2.** Dolby Atmos® also supports wired earphone/headphone connection. **3.** All battery life claims are approximate and based on the median user tested across a mixed use profile (which includes both usage and standby time) under optimal network conditions. Actual battery performance will vary and depends on many factors including signal strength, network and device settings, temperature, battery condition, and usage patterns. **4.** Median users can get up to 12 hours of battery life in 15 min of charge. Battery must be substantially depleted; charging rate slows as charging progresses. **5.** Available user storage is less due to many factors, including operating system, software and functions utilizing part of this capacity; may change with software updates. **6.** Water-repellent design creates a barrier to help protect against moderate exposure to water such as accidental spills, splashes or light rain. Not designed to be submerged in water, or exposed to pressurized water, or other liquids; may diminish over time. Not waterproof. **7.** Available only in certain countries due to regulatory limitations; see service provider for availability; requires separately purchased Wi-Fi 6E compatible router and plan that may vary by location. **8.** Varies by market.
