PRODUCT

Bring flexibility to your business and checkout process with this unique tablet display and security solution. Magnetix is an all-in-one universal solution that works with all tablets and iPads brands and sizes, and enables you to display, secure, and hold the tablet by hand.

Thanks to a unique customer-oriented design, the Magnetix enables to lift and hold the tablet, while it is secured to its base with a cable-lock. This provides a comfortable and elegant way for businesses to easily interact with their customer, and enable them to read and sign papers, register, and perform many other self-services without the concern of stealth attempts.

The Magnetix Wall Mount kit consists of a 100mm VESA magnetic plate that offers an easy way to lift the tablet and dock it back to place, and a cable lock slot. The included cable-lock provides the necessary security, and the Wall Mount acts as an elegant and efficient way to display and rotate the tablet. The kit also includes an adhesive plate that is fixed on any tablet or iPad and attaches to the Magnets.

Its stylish design makes it discreet when the tablet is used off the mount and does not interfere with the user's experience. This extra mobility of the tablet enhances ADA (Americans with Disabilities Act) compliance, as it enables anyone to lift the tablet and hold it by hand or change its viewing angle.

Magnetix Wall Mount is an ideal way to upgrade your existing tablet display solution and customer experience for businesses that want to enable their customers to fill out forms, sign papers, register, and read agreements comfortably, saving valuable time and resources. It is highly
