MetrixInsight for Citrix VAD/DaaS

Overview

MetrixInsight for Citrix VAD/DaaS is a Management Pack for Microsoft System Center Operation Manager (SCOM) to monitor your on-premises Server Based Computing (SBC) and/or Virtual Desktop Infrastructure (VDI) platform based on Citrix® Virtual Apps and Desktops or Citrix® Desktop as a Service.

Our Management Pack solution models and visualizes your platform within a single pane of glass to monitor all parts of your virtualized End User Computing environment.

Features

With MetrixInsight for Citrix VAD/DaaS on SCOM you are able to integrate, visualize and monitor your on-premise Citrix® Virtual Apps and Desktops or Citrix® Desktop as a Service deployment within Citrix® Cloud. It discovers and visualizes the Citrix VAD/DaaS stack topologies in a drilldown dashboard using the different layers that exist in a typical End-User-Computing platform deployment and provides comprehensive monitoring and reporting services to keep the end-user computing platform up and running and your end users happy.
