Targus® 4Vu™ Privacy Screen for 14-inch Edge-to-Edge Infinity-screen Laptops (16:10)

The Targus bdge-to-bdge Privacy Screen is designed to fit 14-inch laptops with 16:10 ratio infinity screens (approx. panel size 30.7 x 21.2 cm). To protect your information, tiny vertical blinds on the surface of the privacy screen narrow the viewing angle so data is only visible directly in front of the monitor up to 30 degrees away from the center of the screen. Onlookers will only see a dark unclear screen when attempting to view the information from a side angle. In addition to providing security, the screen also blocks the glare to help reduce eye strain. The Targus Laptop Privacy Screen can be easily attached by using clear adhesive strips designed for LCD filters or with the included tab guides that stick to the edge of the LCD bezel to hold the screen in place. Users can also position the tabs so the screen easily slides on and off. Highly portable and easy to use, the Targus Privacy Screen prevents onlookers from seeing valuable information often viewed on a laptop or LCD monitor.

• Delivers edge to edge privacy coverage for infinity monitors without bezels
• Protects private information with constrained viewing angles to 30° from either side
• Reduces exposure to blue light by nearly 40%
• Anti-reflective coating blocks screen glare for a comfortable viewing experience
• Over 12% brighter than competitive solutions for greater clarity and visibility
• Glossy and matte sides to suit your viewing preferences
• Convenient attachment methods: clear adhesive strips for fixed installation and adhesive flip over hinges and adhesive hinge tabs for intermittent use
• 2 Year Limited Warranty

Suited for Workplace or Personal Use
One study found that employees are 50% less productive when their visual privacy is at risk, and that two in three employees expose sensitive data outside the workplace1.
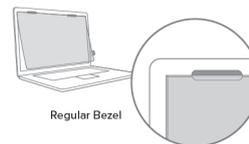

With more of us working in open office settings, on-the-go, or in unsecured environments, visual privacy is a critical consideration for employers and employees alike. Privacy screens add a layer of protection that encourages productivity at the same time it protects confidential information.

30° Viewing Angle
Even in public places like hotel lobbies, airplanes, or cafes, the Privacy Screen keeps your data safe from prying eyes. Your content is visible only to the person directly in front of the screen and up to 30° on either side. You have full clarity and visibility, while onlookers or passersby see only a black screen.
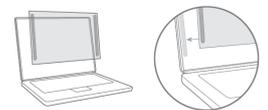

Reduced Glare, Even in Bright Rooms
For an added benefit, our Privacy Screens come with a dual finish – with one side being glossy for a clearer view, while the opposite side offers a matte finish to help reduce glare. Our anti-reflective coating reduces glare and improves light transmittance under most viewing conditions. The result is brightness that's up to 12.4% higher than competitive privacy screens for comfortable, clear views.
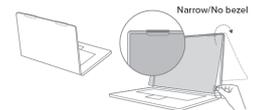

Three Easy Installation Options:

Regular Bezel

Narrow/No bezel

Hinge tabs: shallow hinges along the top edge of the notebook frame (the bezel) to hold privacy filter in place

Long adhesive strips: clear adhesive strips to stick on to the LCD screen for a firm, fixed hold.

Flip-hinges: attach to the top of the privacy screen and over the top of the laptop to create a seamless on/off experience with a simple flip. Use the included adhesive lift tab, to easily flip from privacy mode to public mode without fingerprints.

Blue Light Filtering
Whilst blue light is all around us, too much screen time can lead to increased exposure of artificial blue light, The Targus® Privacy Screen filters blue light by up to 40%
