“It’s not only an **efficiency-enhancing tool**, but also a **culture-changing platform**. We’ve transformed our old world into an innovative, agile and collaborative working environment. **I have 100% more transparency in project work.**”

Sebastian Kraft
Head of Bank Administration, IT and Digital Transformation, VR-Bank Würzburg

Features that help teams focus

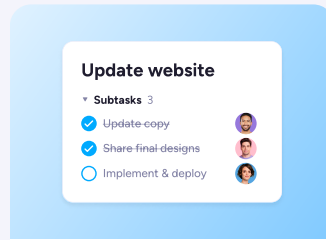

Timeline

Meister's take on the Gantt Chart, Timeline helps you plan, schedule and visualize all of your project's tasks in an intuitive, calendar-based format — so you can get a full overview in seconds.

Automations

Every project has boring, repetitive busywork. Automations handle that for you, assigning tasks, updating statuses, sending notifications, so projects run on autopilot while you tackle higher-value work.

Subtasks

Complex project? No problem. Create subtasks to divide responsibilities and break larger tasks into smaller, more manageable chunks — with all the functionalities of normal tasks.

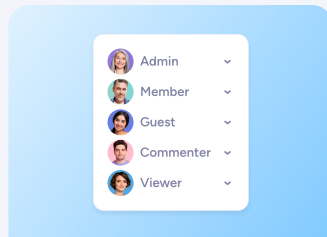

Custom fields

Custom data fields give your organization an additional way to quickly categorize information relevant to each task, ensuring that essential data remains organized and is never overlooked.

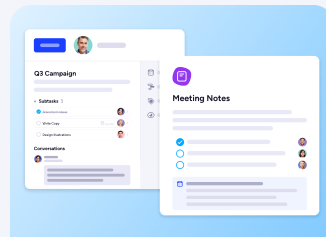

SSO (Single sign-on)

Protect your project with SAML Single Sign-On (SSO) and let your team access MeisterTask with the same credentials they use everywhere else. The result: faster onboarding, tighter security, and IT-friendly control that keeps everyone on track.

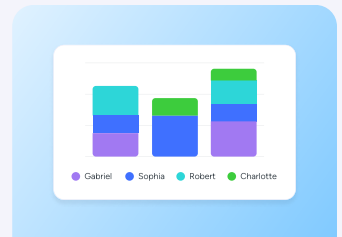

Roles and permissions

Granular roles and permissions let you decide exactly who can view, comment, or change each project and task. This ensures tighter security, clear accountability, and seamless collaboration with zero accidental edits.

Restrict features

Advanced security lets admins switch off or limit select features, including integrations, reports, and project invites, locking down sensitive data and keeping teams focused on approved workflows — no risk, no distractions.

Compliance reports

Downloadable compliance reports put audit-ready evidence at your fingertips. Instantly prove organizational integrity to stakeholders without chasing paperwork, for faster audits, stronger trust, and less time spent compiling documentation.

SECURITY

Reliable. Secure. German.

- ✓ Data hosted in Frankfurt, DE with 99.5% uptime guarantee
- ✓ Strict access management
- ✓ Role-based access, SAML, and 2FA
- ✓ ISO 27001, Cloudflare DDoS protection, third-party testing
