 Intel® 13th Gen Core™ HX-Series Processors: Memory transfer speed will be 3600 MT/s or 4000 MTs under identical DIMM conditions.

Current identical DIMM conditions:

- 2 DIMM per Channel (with 2 Rank DDR5 module): 3600 MT/s
- 2 DIMM per Channel (with 1 Rank DDR module): 4000 MT/s
- 1 DIMM per Channel (with either 1 Rank or 2 Rank DDR module): 4000 MT/s

Mixing Memory DIMM Vendors/Suppliers

Mixing memory DIMM supplier and/or capacity may cause a downgrade in memory speed , signal integrity or functional issues.

Mixing memory Rank (1 Rank and 2 Rank from table above) in the same channel will cause the memory speed to drop to 2000 MHz and could encounter an unstable condition.

Recommendation: Do not install different Rank memory modules in the same channel.

Memory Installation Sequence

Intel® 12th Gen Core™ HX-Series Processors have specific population (installation sequence) rules. To avoid a no-boot issue, there is/are DIMM population installation sequence requirements for cases where only one DIMM is populated per channel, then the furthest memory connector from the CPU should be populated first.

Features

Memory installation sequence is labeled on the memory shielding cover or User Guide. Memory must be installed in correct sequence.

NOTE: Due to the non-industry standard nature of some third-party memory modules, we recommend HP branded memory to ensure compatibility. If you mix memory speeds, the system will perform at the lower memory speed.

NOTE: SSD/SODIMM requires low to moderate technical skills required to replace

NOTE: FreeDOS is limited to 32GB MAX ex-factory. Customer can add RAM, but should not uninstall their FreeDOS rev., but can upgrade.

NOTE: Transfer rates up to 4000 MT/s for nECC and ECC memory combinations when memory suppliers are consistent. If suppliers are not consistent, speeds may drop to 2000 MT/s for nECC and 2000 MT/s for ECC memory combinations. A custom configuration including part number AY104AV can be used to lock in a consistent vendor.

NOTE: Intel® allows architectures designed with four DIMM slots to run at 4000 MT/s

NOTE: Maximized dual-channel performance requires SODIMMs of the same size and speed in both memory channels.

Intel® Wi-Fi CERTIFIED 6E AX211 (2x2) and Bluetooth® 5.3 combo wireless card, non-vPro®

¹Wi-Fi 6E requires a Wi-Fi 6E router, sold separately, and Windows 11 to function in the 6GHz band. Availability of public wireless access points limited. Wi-Fi 6E is backwards compatible with prior 802.11 specs. And available in countries where Wi-Fi 6E is supported. Not supported with Windows 10.

WWAN

Intel® XMM™ 7560 LTE Advanced Pro¹
Intel® 5G Solution 5000²

¹WWAN use requires separately purchased service contract. Check with service provider for coverage and availability in your area. Connection speeds will vary due to location, environment, network conditions, and other factors. 4G LTE not available on all products, and in all regions.

²Intel 5G module is optional and must be configured at the factory. Module designed for 5G NR NSA (non-standalone) networks as carriers deploy Evolved-Universal Terrestrial Radio Access New Radio Dual Connectivity (ENDC) with both 100Mhz of 5G NR and LTE channel bandwidth, using 256QAM 4x4 as defined by 3GPP. Module requires activation and separately purchased service contract. Check with service provider for coverage and availability in your area. Data connection, upload and download speeds will vary due to network, location, environment, network conditions, and other factors. Backwards compatible to 4G LTE and 3G HSPA technologies. 5G module planned to be available in select platforms and select countries, where carrier supported.

* Intel® 5G module is optional and must be configured at the factory. Module designed for 5G NR NSA (non-standalone) networks as carriers deploy Evolved-Universal Terrestrial Radio Access New Radio Dual Connectivity (ENDC) with both 100Mhz of 5G NR and LTE channel bandwidth, using 256QAM 4x4 as defined by 3GPP. Module requires activation and separately purchased service contract. Check with service provider for coverage and availability in your area. Data connection, upload and download speeds will vary due to network, location, environment, network conditions, and other factors. Backwards compatible to 4G LTE and 3G HSPA technologies. 5G module planned to be available in select platforms and select countries, where carrier supported.

RoHS Compliance

HP Inc. complies fully with materials regulations. We were among the first companies to extend the restrictions in the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive to our products worldwide through the HP GSE. HP has contributed to the development of related legislation in Europe, as well as China, India, and Vietnam.

We believe the RoHS directive and similar laws play an important role in promoting industry-wide elimination of substances of concern. We have supported the inclusion of additional substances—including PVC, BFRs, and certain phthalates—in future RoHS legislation that pertains to electrical and electronics products.

We met our voluntary objective to achieve worldwide compliance with the new EU RoHS requirements for virtually all relevant products by July 2013, and we will continue to extend the scope of the commitment to include further restricted substances as regulations continue to evolve.

To obtain a copy of the HP RoHS Compliance Statement, see [HP RoHS position statement](#).
