- External power provided by USB cable (included)
- 2 year warranty

The Lindy DisplayPort 1.2 bi-directional switch is a compact, effective solution for manually switching between either two DisplayPort source devices, or two DisplayPort displays, depending on the desired layout.

Supporting resolutions up to 4K@60Hz, this switch is ideal for ensuring superb clarity in gaming setups, small scale office installations or design applications. This switch supports Dual Mode DisplayPort for seamless compatibility with both active and passive converters, allowing for integration with pre-installed cabling. This switch is also G-Sync & FreeSync compatible, ensuring synchronised refresh rates of the connected display to provide a fast, smooth experience within gaming setups.

Simple switching control is provided by a push button on the main unit, perfect for both professional and first-time users. The device is powered by an included USB cable connected to an external power supply (not included).
