

Product Carbon Footprint Report

10-Nov-2023

HP Z6 G5 A Workstation ENERGY STAR

Estimated impact

1,415
kg CO₂ eq.

As part of HP's commitment to continually improve the environmental performance of our products, we utilize product carbon footprinting (PCF) to better understand environmental impacts that occur at different stages of the product life cycle. A product carbon footprint is defined as the total amount of greenhouse gases emitted directly and indirectly by a product over its lifetime. Greenhouse gas emissions are reported as global warming potential for 100-year time horizon (GWP-100) in units of CO₂ equivalence. Our product carbon footprints include full value chain emissions, which incorporate carbon emissions due to raw materials extraction, manufacturing, distribution, use, and product end-of-use.

The information provided here represents the lifecycle carbon footprint of an industry-average desktop computer with the specifications listed in Assumptions table.

GHG Emissions

Manufacturing Breakout

Mainboard and other boards	45%
Solid State Drive (SSD)	26%
Chassis	12%
Power Supply Unit & External Cables	8%
Hard Drive (HDD)	5%
Others*	3%
External components (Keyboard & Mouse)	1%
Packaging	1%

HP's environmental impact calculations are done in accordance with ISO 14040/44. All estimates of impact results are uncertain, resulting largely from data limitations and data quality. To mitigate this uncertainty, HP has developed HP-specific tools that use a combination of HP processes and product data, as well as high-quality lifecycle assessment data. HP strives to provide the most accurate environmental impact results but uncertainty will never be completely minimized and results should be considered accordingly.

Assumptions		
Lifetime of product (years)	5	
Use location	North America	
Use energy demand (kWh/year)	364.79	
Product weight (kg)	15.75	
Screen size (in)	0	
Final manufacturing location	China	

Additional product environmental performance

Additional information about HP's carbon footprinting program can be found in HP's yearly Sustainability Report, which is available on the HP Sustainability website.

The site also contains IT Eco Declarations, which provide product-specific environmental information, as well as information on HP's product recycling programs.

* Others section includes assembly energy, other subassemblies and all subassemblies packaging and transport
