

Radio Socket

00176638 Smart WLAN Socket, Matter, Voice and App-Controlled, Retrofittable, 3680 W

Highlightstext:

- Retrofit smart the smart way: with the smart socket, quickly and easily convert your home into a smart home and switch electrical devices such as standard lamps, Christmas lights and stereo systems conveniently off and on via the app or voice command
- It doesn't matter: with the Matter Smart Home standard, you can connect the WLAN socket, regardless of the manufacturer, to any Matter-compatible app, such as Alexa, Apple Home or Google Home - so you can control smart devices around the home with even more convenience
- Scan and go: see how easy a smart home can be - scan the QR code with a smartphone and the WLAN socket is automatically incorporated into the Matter smart home
- Programmable smart home socket = timer: you can switch light chains, standard lamps, TVs, etc. on and off at defined times whenever you want or even match them with the sunrise or sunset - simply set it up via the app and you no longer have to think about them
- Save energy the smart way: with the smart socket, you can specifically control your electrical devices either through automation in the app or spontaneously from wherever you are, ensuring you only use that power when it's needed
- Whether it be the sofa, beach bed or office: with the Hama Smart Home app or voice commands through Amazon Alexa, Google Assistant or Apple Siri, you can control the smart socket more conveniently from anywhere than with a radio remote control
- Powerful, intelligent socket: suitable for all devices up to 3680 Watts - whether they be decorative lighting, fans or entertainment electronics
- Space-saving and intelligent: the extremely compact design of the Smart socket integrates perfectly in confined spaces, since the space-saving construction does not cover any adjacent or sockets
- Our WLAN socket works without any gateway (hub): you don't need an additional device, and you save on extra costs since the socket establishes a direct WiFi connection to the router
- Step by step to the Smart Home: with the Hama Smart Home app, you can expand and network your smart home with any number of Hama Smart Home products
- High compatibility: this WLAN socket connects via the Matter smart home standard with all compatible smart home systems, e.g. Apple Home, Google Home, Samsung SmartThings, Amazon Alexa, Home Assistant and Smart Life
- Create groups, scenes and automations that make your life easier and more beautiful with other smart devices integrated into the WLAN
- You are kept informed at all times about the current status of the devices connected to the WLAN socket via the app or push notification
- Manual switch: socket can also be switched off and on directly by hand
- With increased protection against accidental contact
- Your data is stored exclusively on German servers

System Requirements:

- Operating system: Android 6.0/iOS 16.3 or later

Note for Consumers:

Gateway-free only when used in the Hama Smart Home app.

Note the requirements if other manufacturers are used.

Technical characteristics:

- Colour: White
- Shade of colour: White
- Connection: Socket with Earth Contact
- Power connector plug type: Type E+F (CEE 7/7)
- Signal Transmission: WiFi
- Frequency: 2.4 GHz
- Switching Capacity: 3680 W
- Ambient Temperature during Operation: ca. 0°C to ca. +35°C

Radio Socket

00176638 Smart WLAN Socket, Matter, Voice and App-Controlled, Retrofittable, 3680 W

- IP protection class: IP20 (Dry Rooms)
- Maximum Load: 3680 W
- Special Feature: Matter compatible
- Voice Assistant: Amazon Alexa/Apple Siri/Google Home
- Depth: 5.5 cm
- Height: 7.7 cm
- Width: 5.5 cm
- App Control: Amazon Alexa, Apple Home, Google Home, Hama Smart Home, Matter, SmartThings
- Recommended Use: Home Assistant

Delivery:

- 1 smart WLAN socket
- 1 QR setup code for sticking up
- 1 quick reference guide
