Lenovo ThinkBook Gen 2 family devices

Whatever happens, ThinkBooks are ready

Accidents happen. After all, we are only human. But what if those accidents didn't have any consequences. Lenovo ThinkBook Gen 2 devices are MIL-SPEC certified. This means that when you inevitably drop your bag, or spill a freshly brewed cup of coffee, your laptop is built to shrug it off.

Rigorous MIL-SPEC testing is carried out for a reason: so you don't have to spend your time worrying about your device. And you can stay connected and productive wherever you work, with whatever life throws at you.

From 'laptop boot camp' to the real world

Finishing up after a long day, and knock your backpack off the desk? Don't worry. We tested ThinkBook for all extremes.

In fact, research reveals that spillage is one of the most frequent causes of laptop damage, at 39% of cases*. Furthermore, accidental damage claims rose by 23% in 2020*, meaning a clumsy moment on a sleepy morning could easily see the demise of your device, and with it your working day. But not if it's one of the Lenovo ThinkBook Gen 2 portfolio.

Of course, the rigor of MIL-SPEC testing isn't the only reason to choose from the ThinkBook Gen 2 portfolio.

The slim, sleek good looks, versatility, high performance, superb displays, excellent connectivity, and a host of other thoughtful features and details all play their part.

It's reassuring to know that the MIL-SPEC regime, and Lenovo's industry standard additional quality checks, have produced devices tough enough to shrug off the bumps and hazards of everyday life.

All the while being stylish enough to help you stand out when you need to impress.

Industry-leading, MIL-SPEC testing:

ThinkBook Gen 2 model	MIL-SPEC Standard 810G or 810H	Certified Procedures / Methods
