How to install and remove caged nuts

⚠ CAUTION

FALLING EQUIPMENT

To ensure equipment installs securely, install cage nuts
with tabs engaging the left and right sides of the square
hole. Do NOT install cage nuts with tabs engaging the
top and bottom of the square hole.

**Failure to follow these instructions can result
in injury or equipment damage.**
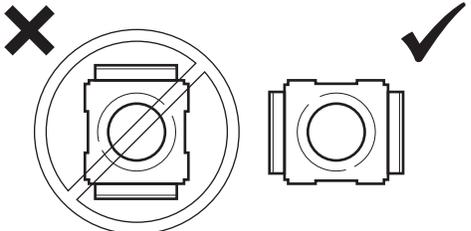

To install a cage nut:

1. From the inside of the enclosure insert the cage nut into
   the square hole by hooking a tab from one side of the
   cage nut onto one side of the opening.

2. Place the cage nut tool onto the tab on the opposite side
   of the cage nut and pull to snap it into position.
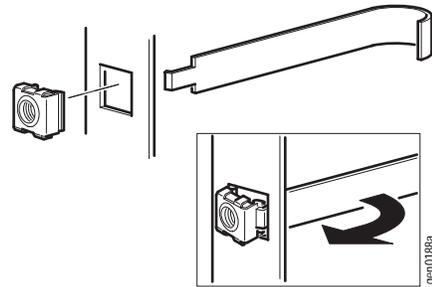

To remove a caged nut:
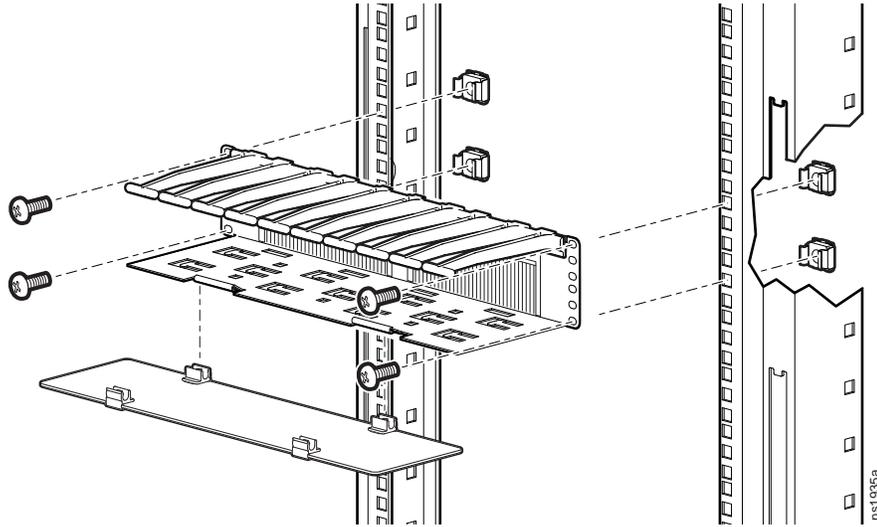

1. Squeeze the tabs together to release.

Installation

## Adjust the vertical mounting rails

Adjust the depth of the vertical mounting rails, if needed, for non-networking enclosures.
