

LANCOM WLC Upgrade Option

- Option that upgrades WLAN controllers to manage up to 1,000 access points or WLAN routers
- Available as the WLC AP Upgrade +6 option for the LANCOM WLC-4006+ for up to 30 WLAN devices and LANCOM routers, including the WLC Basic option for routers
- Available as WLC upgrade +10, +25, +100 and +500 option for 10 to 500 additional access points and WLAN routers
- · Simply upgrade your existing device and save on hardware components

LANCOM WLC Upgrade Option

Upgrade of manageable WLAN devices

The LANCOM WLC Upgrade Option enables you to increase the number of access points and WLAN routers that the controller is able to manage. Your network stays optimally scalable—without additional hardware components.

Maximum future viability

LANCOM products are designed for a service life of several years and are equipped with hardware dimensioned for the future. Even reaching back to older product generations, updates to the LANCOM Operating System – LCOS – are available several times a year, free of charge and offering major features.

LANCOM WLC Upgrade Option
