

DVI to VGA Adapter Cable, 0.2m

Part No.: 41222

Description

- Connectors: DVI-A Male to VGA 15 Way HD Female
- 10 Year Warranty
- Length: 0.2m

Please note: The DVI-A connector used in this cable mates to the analogue pins incorporated in the DVI-I interface to send the analogue signal to the VGA input of your monitor. It does not convert DVI digital signals to VGA analogue!

Technical details

This high-quality adapter cable allows you to connect a computer with a DVI-I analogue output to a VGA monitor with a built-in VGA cable (i.e. 15 Way VGA Male)

Many modern graphics cards feature both DVI-I (digital and analogue) and VGA (analogue) connectors. This cable is useful when you want to connect two VGA monitors to a computer equipped with one of these cards - simply connect the first monitor to the VGA port and the second, using this cable, to the DVI port!
