

PowerHouse™ Charging Dock for Apple Watch+ iPhone

THE COMPLETE PACKAGE

Charge and display your Apple Watch and iPhone simultaneously with the 2-in-1 PowerHouse Charging Dock for Apple Watch + iPhone. With a Magnetic Charging Module for the Apple Watch built into the dock, your Apple Watch aligns magnetically and begins charging instantly. The syntax implies the iPhone can be adjusted. For clarity/correctness, it seems best to turn the wording around: 'To charge your iPhone, the dock also features a built-in VersaCase™ Lightning connector, which', that can be adjusted to fit almost any case. Engineered to charge both devices at the fastest possible speed, the dock also elevates them for safety and visibility while they charge.

PowerHouse™ Charging Dock for Apple Watch+ iPhone

BENEFITS

DUAL CHARGING

Two integrated chargers within the dock provide simultaneous charging: a built-in Magnetic Charging Module specifically designed for your Apple Watch, and an adjustable Lightning connector for the iPhone that allows you to charge without removing the case. With a charger for Apple Watch hardwired into the dock, it frees up the one provided with your Apple Watch to use as a spare, at work, in the car or wherever it's needed.

VERSACASE FITS ALMOST ANY CASE

The adjustable built-in Lightning connector moves backwards and forwards and up and down to make plugging in your iPhone easy. The red dial at the back of the dock raises and lowers the connector enough to accommodate almost all cases on the market, so you don't have to take your iPhone out of the case to plug it in. Whether you have a slim, barely-there case or one that's thicker for added protection, you can be sure of a secure fit and a fast connection.

CHARGE IN SAFETY

The dock is designed to hold your Apple Watch and iPhone above the surface of your desk or bedside table to prevent scratches. It also provides visibility and easy access.

COMPACT & MINIMAL

Designed to be neat and minimal with a small, compact footprint, this charging dock fits effortlessly into your home or office.

BELKIN SAFETY

This product has been tested across multiple checkpoints to meet highest standards of quality and safety. Checkpoints include efficiency, "safe zone" operating temperature and flawless performance above and beyond reasonable use. Products are also engineered to moderate and control voltage and current delivery, to prevent damage to connected devices and to ensure personal safety.

BELKIN QUALITY

Advanced design, quality construction and superior circuitry and components deliver premium product quality. Coupled with rigorous testing procedures, the Belkin name provides added peace of mind for our customers.
