COMMON ASSET OPERATIONAL PAIN POINTS

Which challenge most disrupts your customers? – Here is what customers are telling us.

01

Devices go missing, how do you know locations have enough devices?

- “Devices ‘walk off’ all the time”
- “1 in 3 of our devices go missing”
- “My locations constantly ask for new devices”

02

Limited accountability or visibility to who is using which device

- “Our team tracks what device each worker has on pen and paper.”
- “Some workers hide their favorite device in the store”

03

Batteries fail in the middle of shifts

- “Team members have to return to device storage if their battery dies”
- “Sometimes devices don’t last a full shift”

04

Apps stop working & the network has trouble spots

- “Workers don’t have time to submit issue tickets”
- “Sometimes days go by before we know there is a problem”

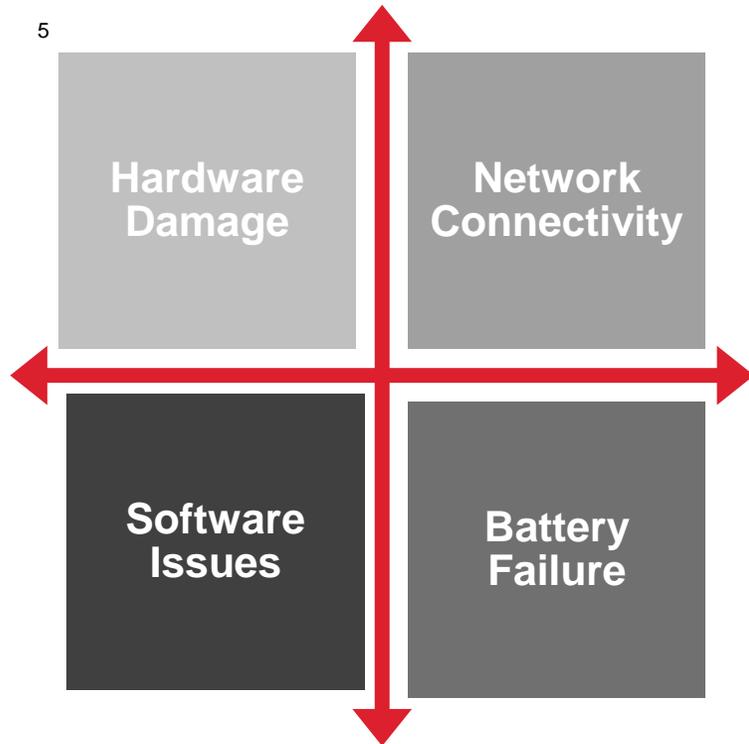

05

Devices need to be staged, configured, managed, & updated centrally & at scale

- “how can we efficiently configure thousands of devices in multiple locations?”
- “I need to automate OS, firmware, and software updates across thousands of devices with minimal resources”

THE HIDDEN COST OF WORKFLOW DISRUPTION

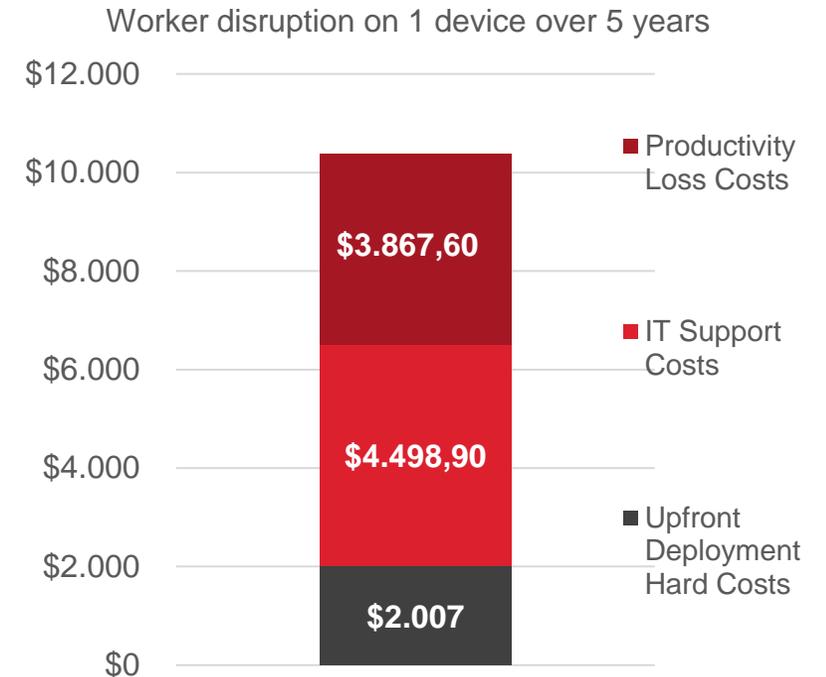

Leading disruptions for frontline workers

Impact of this disruption

- **60-110 mins lost** in mobile worker productivity **per issue**¹
- **40-60mins** of IT Support **per issue**²
- Batteries fail to support a shift **75% of the time**³
- **23% of device failures** are reported as no fault found⁴

Impact of these issues over 5 years/device

¹⁻⁵ TCO Models for LOB Mobile Solutions, VDC Research

1. DEVICES GO MISSING & SITES ALWAYS WANT MORE

THE CHALLENGE

Linda works for a mid-sized grocery chain in the mid-west.

- In the middle of replenishing stock, she leaves her task to help at the check-out counter. In the process she misplaces her device.
- Due to the rush, Linda does not have time to find it. She looks for it for 5 mins then informs her manager, who tells her to get a secondary device for the day.
- At the end of the day the closing manager notices a device was not docked. After a brief search (5 mins), she makes a note to request a new device from IT the following day.

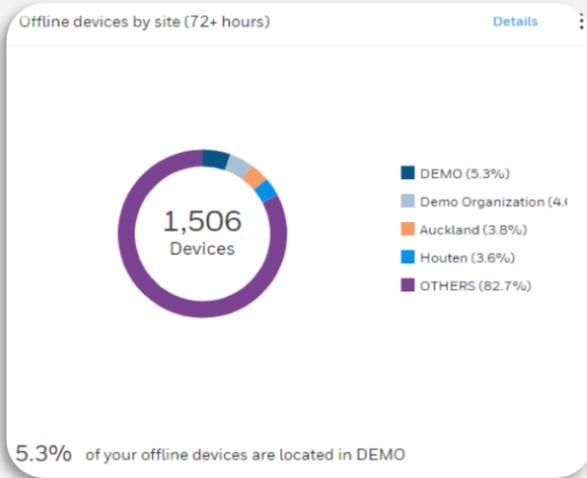

POTENTIAL IMPACT

\$2.2M/YR

Number of locations (Store)			150
# of employees/store			20
# of shifts/day			3
# of incidents per shift			1
PRODUCTIVITY COSTS			
Total time spent looking for device per incident			10
Cost of employee time/hour			\$15
	Daily		Annual
Cost of employee time/incident	\$ 2.50	\$	912.50
Total lost productivity all stores	\$ 1,125	\$	410,625
IT COSTS			
Lost devices that are not found/month/store			1
IT Members time validating device is lost/incident			30
Cost of IT employee time/hour	\$	25.00	
Avg. Cost of a Device			\$600
	Daily		Annual
Cost of IT employee time/incident	\$13		\$22,500
Total IT Time Cost	\$1,875.00		\$684,375
Total Device Cost			\$1,080,000
TOTAL COST OF LOST DEVICES ANNUALLY			
	Monthly		Annually
	\$ 181,250	\$	2,175,000

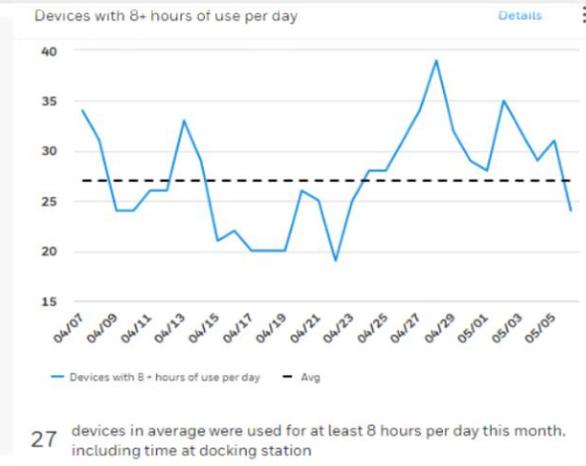

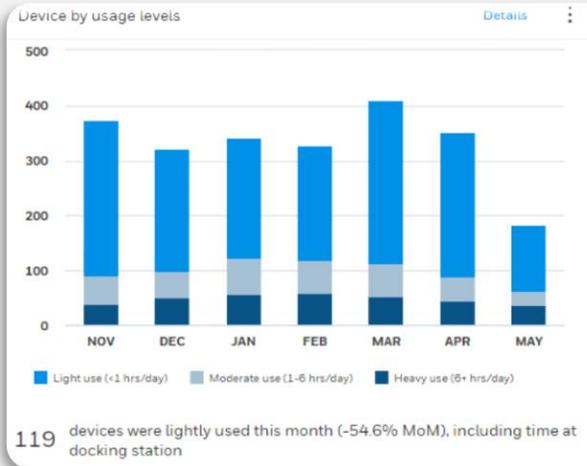

HONEYWELL OPERATIONAL INTELLIGENCE

Core Problem: Devices go missing, how do you know locations have enough devices?

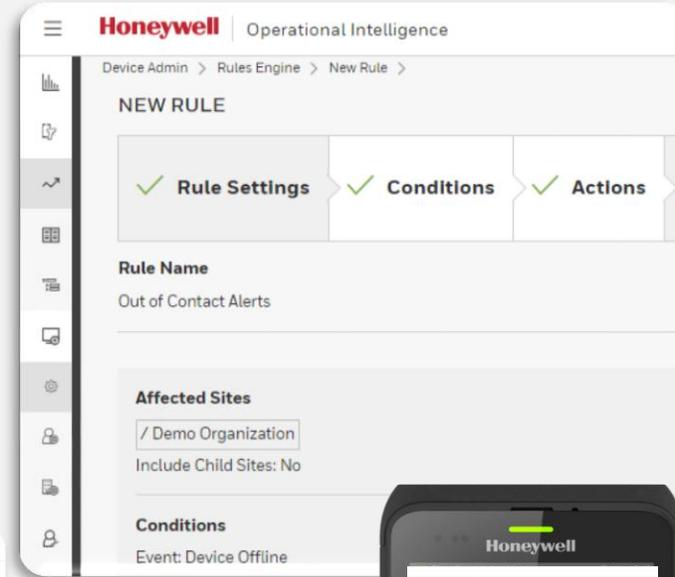

Identify lost or stolen devices

Monitor site behavior by tracking offline & never used devices

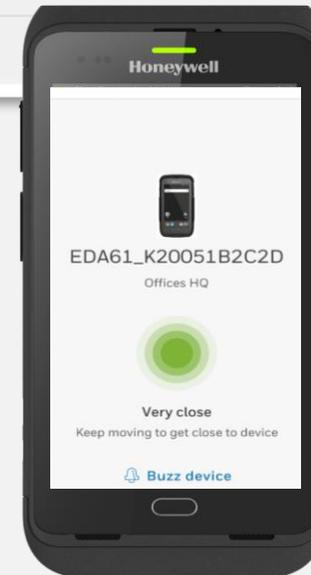

Monitor usage at the site, location & device level

Ensure each location has what they need & proactively reach out for dips in utilization

Automate workflows for Out-of-Contact Devices

Configure automated rules to alert Site Operations to devices that are offline too long.

Find Devices that are lost

Simple android application that locates lost devices and pings them when close.

2. ASSOCIATES PHYSICALLY SIGN OUT A DEVICE ON PAPER WITH NO REAL ACCOUNTABILITY

THE CHALLENGE

Tracy works for a mid-sized grocery chain in the mid-west.

- At the start of her shift Tracy is supposed check out her device by writing her name on the sign out sheet. The store is busy and she's running behind and decides to do it at the end of the day.
- During her shift she accidentally drops it. When she picks it up, she notices the screen is cracked.
- At the end of her shift Tracy is worried about getting into trouble so she hides her device knowing that no one will know she was the one who did not turn it back in.
- At the end of the day the closing manager notices a device was not docked. After a brief search (5 mins), she makes a note to request a new device from IT the following day

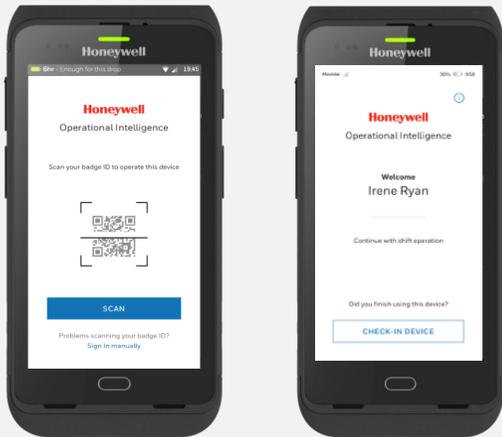

POTENTIAL IMPACT

\$2M/YR

Number of locations (Store)			150
# of employees/store			20
# of shifts/day			3
# of incidents per shift			1
PRODUCTIVITY COSTS			
Total time spent looking for device per incident			5
Cost of employee time/hour			\$15
	Daily	Annual	
Cost of employee time/incident	\$ 1.25	\$ 456.25	
Total lost productivity all stores	\$ 563	\$ 205,313	
IT COSTS			
Broken/lost devices that are not found/month/store			1
IT Members time validating device is lost/broken			30
Cost of IT employee time/hour	\$ 25.00		
Avg. Cost of a Device			\$600
	Daily	Annual	
Cost of IT employee time/incident	\$13	\$22,500	
Total IT Time Cost	\$1,875.00	\$684,375	
Total Device Cost			\$1,080,000
TOTAL COST OF LOST DEVICES ANNUALLY			
	Monthly	Annually	
	\$ 164,141	\$ 1,969,688	

HONEYWELL OPERATIONAL INTELLIGENCE

Core Problem: Workers physically sign out a device on paper with no real accountability

Easy device check-out for full accountability

Worker's check-out devices & back in again at the end of their shift. Interior location-based check-in ensures full compliance

Audit Checked-Out Devices in real time

Get full visibility to devices in use & a full historical audit trail.

User device drop notifications

Drive new user behavior with optional frontline worker device drop notifications and alerts

Monitor device drop behavior & application usage

Identify device abuse coaching opportunities and monitor application utilization

3. BATTERIES FAIL IN THE MIDDLE OF SHIFTS

THE CHALLENGE

John works for a mid-sized grocery chain in the mid-west.

- John has a favorite device that he believes works exactly the way he wants it too. He likes to use the same one everyday. He stores his device in a secret spot to make sure that he gets the same one each day.
- John is in the middle of scanning inventory when his device powers down due to low battery.
- John walks to the back room to get a spare that he knows is charging on a dock. He swaps the battery and walks back out to continue his task.
- Because John rarely docks his device, it does not update consistently which causes applications to crash multiple times/week.

POTENTIAL IMPACT

\$2M/YR

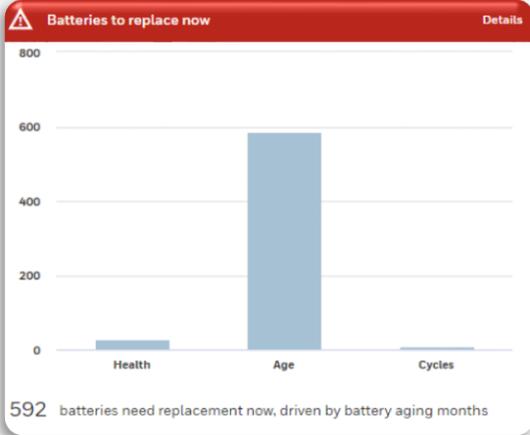

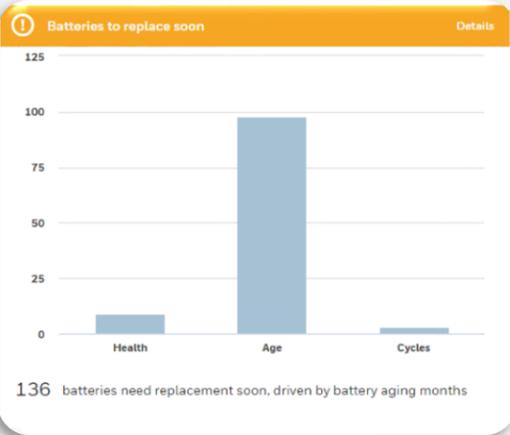

Number of locations (Store)	150	
# of employees/store	20	
# of shifts/day	3	
# of incidents per shift	3	
PRODUCTIVITY COSTS		
mins spent getting a new battery/incident	10	
Cost of employee time/hour	\$15	
	Daily	Annual
Cost of employee time/incident	\$ 2.50	\$ 912.50

4. APPS STOP WORKING & THE NETWORK HAS TROUBLE SPOTS

THE CHALLENGE

Sam works for a mid-sized grocery chain in the mid-west in IT.

- Sam supports 150 stores on a small IT team (10)
- Sam's spends a lot of time responding to individual tickets around applications not working in the field. Root causes of this issue vary from network issues to the apps themselves failing and needing updates.
- Sam is responsible to respond to each issues within 24 hours
- About **half** of the issues Sam responds too are related to application-level issues and issues ultimately caused by network & access point level failures.
- Sam does about 8 tickets/day and about 60 mins per issue
- Each issue represents about 60 mins of disruption at the store due to issue disruption.

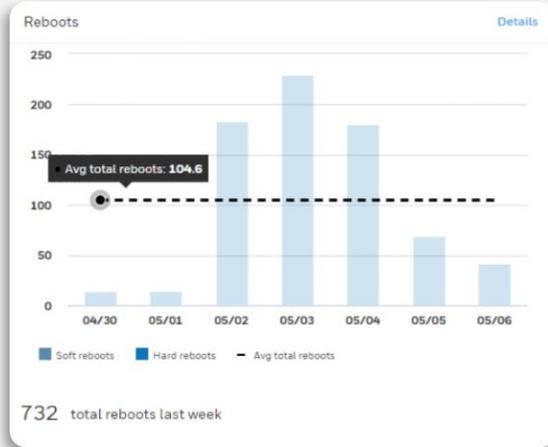

POTENTIAL IMPACT

\$1.6M/YR

Number of locations (Store)	150	
# of IT Employees	10	
# of tickets per day	100	
AVG mins spent per ticket (IT+Store Disruption)	120	
IT COSTS		
IT's time spent troubleshooting/ticket (in hrs)	1	
Cost of employee time/hour	\$28	
	Daily	Annual
Cost of employee time/incident	\$ 2,800.00	\$ 1,022,000.00
Store Productivity Disruptions		
Store's time spent impacted by disruption (in hrs)	1	
Cost of Associate/hr	\$15	
	Daily	Annual
Cost of Store Associate/day troubleshooting issues	\$1,500	\$547,500
TOTAL COST OF MID SHIFT BATTERY FAILURE ANNUALLY		
	Monthly	Annually
	\$ 129,000	\$ 1,569,500

 POOR SIGNAL STRENGTH

Access Point 80F1 has experienced TCP high-latency for the past 3 days. [Reset or Reposition](#) to get back on track.

Access Point Heat Map

Customer's, partners, & network providers spend weeks troubleshooting network issues and dead spots.

Get the devices view of Access Point signal strength to help isolate problems and be proactive.

5. PRINTER INSIGHTS & ASSET MANAGEMENT

THE CHALLENGE

Potential Impact

- Unknow Printer Utilization
- High-touch configuration
- Reactive Troubleshooting

Average Hospital

- 2000+ Printers
- 160 Locations
- 100K+ labels printed/year

Utilization/ Right Sizing

- 2000 Printers across 160 locations, it's hard to determine if there are enough or too many devices in each location
- Assets can likely be moved between locations instead of buying more

Preventable Failure

- Wasted time & resources troubleshooting onsite
- Wasted time troubleshooting locally & not doing other tasks
- Unattended issues can be mission critical and expensive if delayed

Onsite-Required Configuration

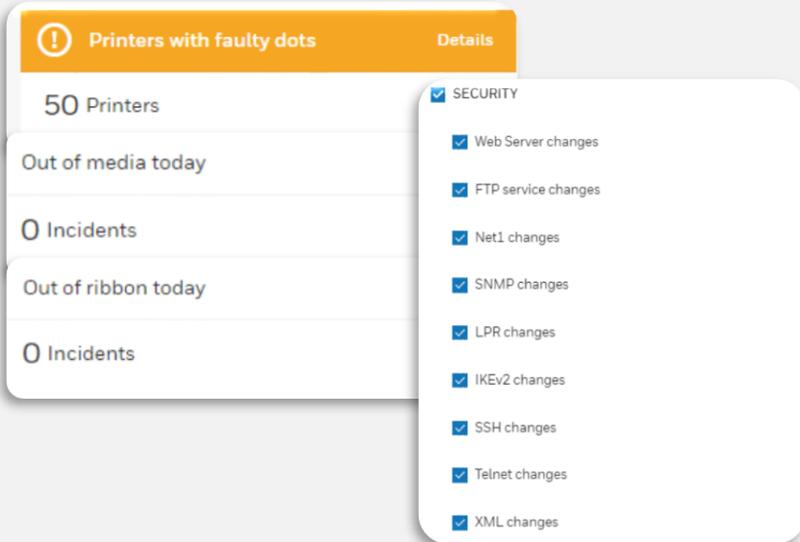

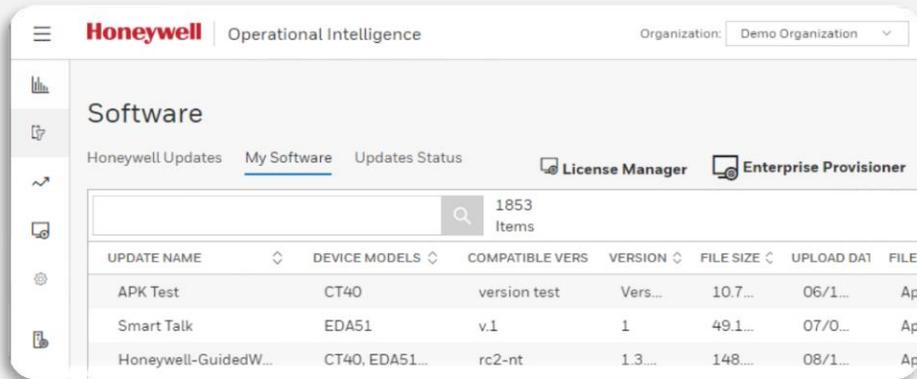

- 2000 prints over 160 locations where configuration must be done in person & associated cost includes
 - Time spent at each printer
 - Time spent navigating location
 - Time & resources traveling to locations

HONEYWELL OPERATIONAL INTELLIGENCE

Manage & Monitor Your Honeywell Printer Assets

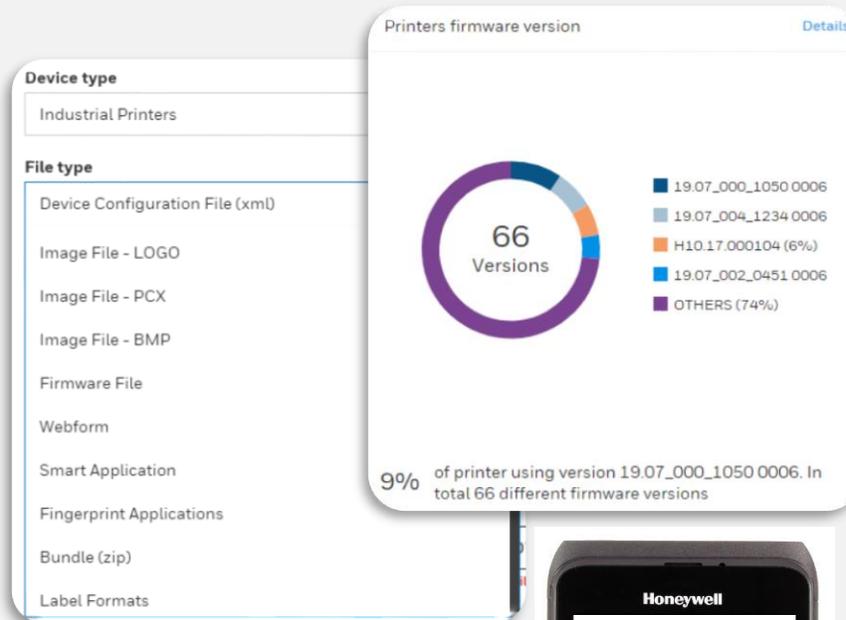

Centralized Provisioning & Configuration

Fully & centrally provision, stage, & configure your Honeywell printers, mobile computers & scanners

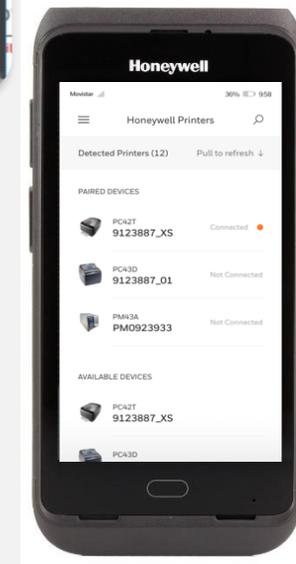

Critical Disruption Monitoring

Multiple dashboards, over **50** configurable alerts, and essential security monitoring, provide IT teams every they need to be alerted in real time to printer disruption in the field.

Update Apps/Firmware/OS

Ensure compliance and security by centrally automating your update process for device applications, security patches, & Operating System updates

Bluetooth Printer Management through mobility application

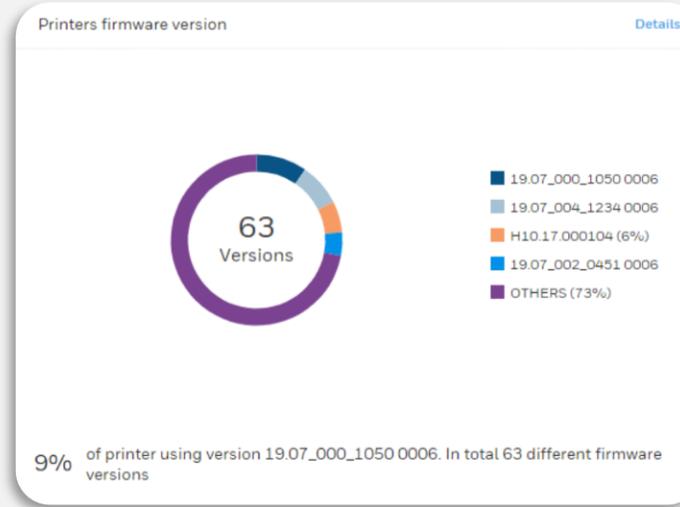

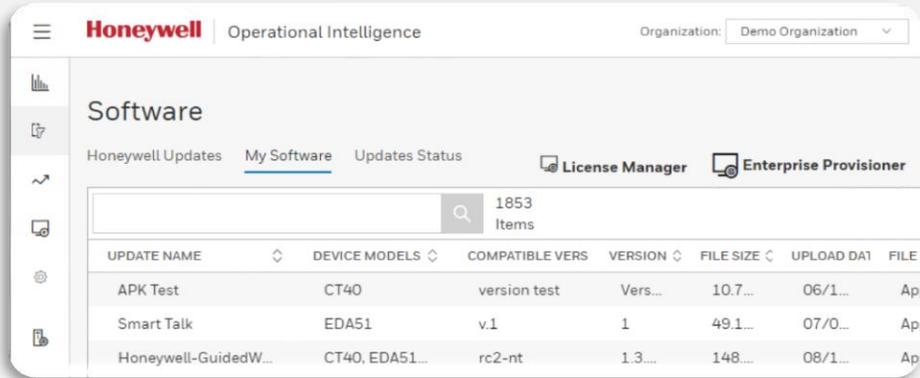

Update, configure and manage BT only printers using a Honeywell mobile computer as a gateway

HONEYWELL OPERATIONAL INTELLIGENCE

Manage Your Honeywell Mobile Assets

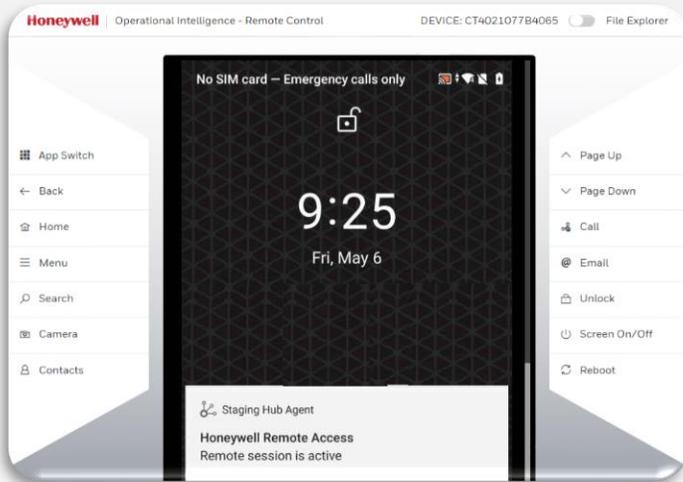

Device Staging & Configuration

Fully & centrally provision, stage, & configure your Honeywell printers, mobile computers & scanners

Update Applications/Firmware/OS

Ensure compliance and security by centrally automating your update process for device applications, security patches, & Operating System updates

Remote Control & File Browser

Respond instantly and remotely to issues in the field. Fully control Honeywell mobile computers.

View device files and update them in real time

Honeywell Launcher & Browser

Includes term license of Honeywell's secure launcher and enterprise Browser solutions

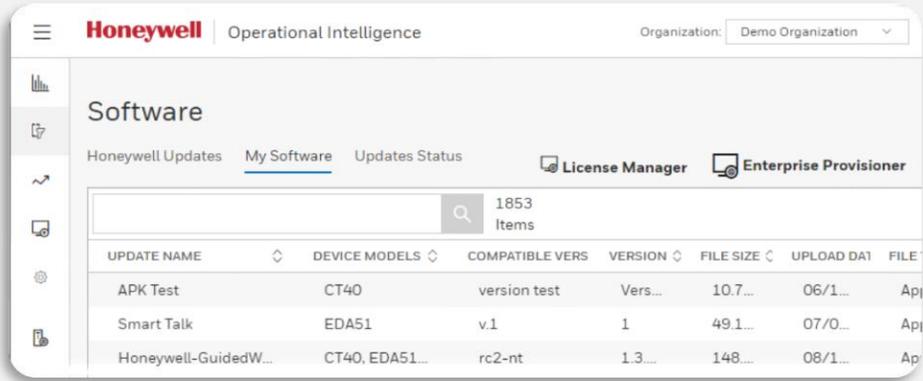

HONEYWELL OPERATIONAL INTELLIGENCE

Manage Your Honeywell Scanners

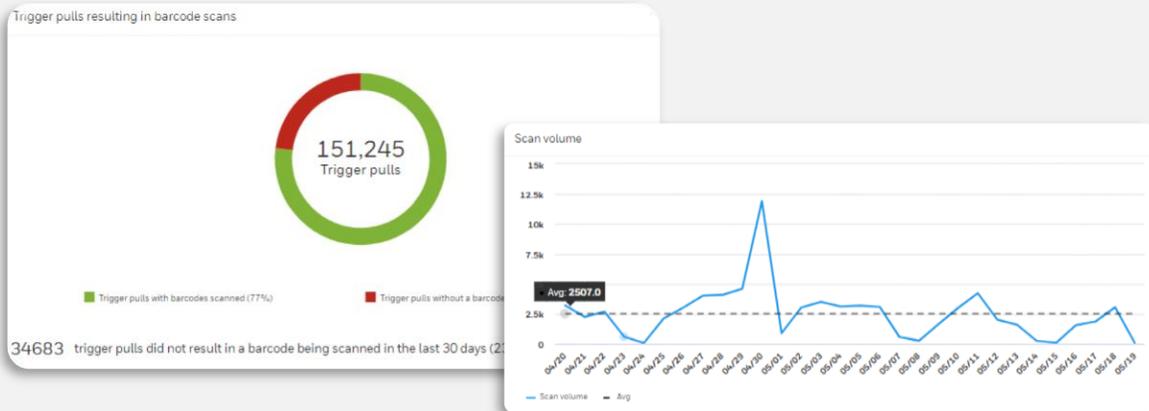

Device Staging & Configuration
