

## Workshop | First Steps in Change Management Initial analyses and developing a change management plan

Successfully introducing new technologies requires users to change their behavior. And change can be hard. It's more than just learning how to use a new application. It's a fundamentally different way of working.

**This change is about people.**

We help you manage the people factor in your IT project\*. Make the new technology an experience for your employees and generate the maximum value.

# Let's take your first steps in Change Management together!

In a 1- to 2-day workshop, we analyze how the change will affect your employees. We identify the framework for change management in your project and highlight suitable best practices for your initiative. The goal is to ensure the sustainability of your project's success by having your employees accept and efficiently use the new technology.

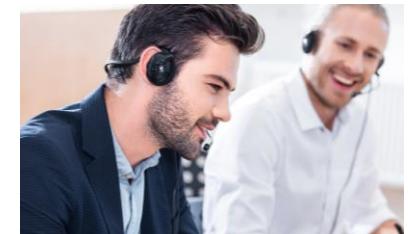

## Preliminary steps

Deciding on the group of participants, clarifying your expectations and answering initial questions.

## Workshop | First steps in Change Management

1 to 2 days at your site or remotely with certified consultants. Afterwards our consultants evaluate the results of the workshop. You will receive an individual concept and further recommendations from us.

## Next steps

We present your custom outcome documents to you remotely

## Your benefit

- ✓ Fundamental understanding of Change Management
- ✓ Approach of your **individual change management plan**
- ✓ A **tangible action** list for your next steps
