POLICYHOLDER INFORMATION

Full Name: John A. Doe
Policy Number: PA-2025-789456
Phone Number: (555) 123-4567
Email Address: johndoe@email.com

ACCIDENT DETAILS

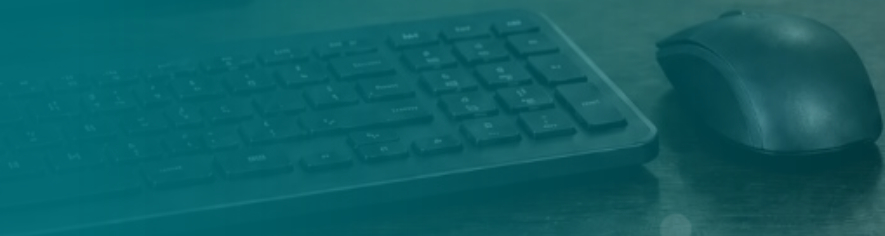

Date of Loss: May 15, 2025
Time of Loss: 2:30 PM
Location of Loss: 123 Main Street, Anytown, USA
Description of Accident: While driving northbound on Main Street, another vehicle failed to stop at the intersection and collided with the driver side of my vehicle.

VEHICLE INFORMATION

Year: 2022 Make: Honda Model: Civic VIN: 1HGBH41F2M1001234

01 The opportunity & the product

Every workflow strategy starts with the capture device

From

Capture treated as hardware to deploy, not a standard to run.
Setups drift site to site and manual workarounds creep in.

To

Capture deployed as a strategy, standardized and integrated everywhere work happens.

One Standard, End To End

Point of work → Workflow & operations → Business systems → Business outcome

The Cost Of Standing Still

Sites drift from standard processes. Rework, rescans grow with volume. Intake and claims stall at the point of work. Records you cannot produce or read become audit findings. Doing nothing is a recurring tax on every document.

What It Is

The N2000 Series

A brand-new distributed capture platform. It turns paper into accurate, actionable digital information, reliably and consistently, everywhere work happens, and it scales from a single desktop to a distributed fleet.

Portfolio Fit The N2000 Series is the new addition to our Distributed Capture Family.

What It Is

A high-performance, intelligent document capture solution for distributed, document-driven environments.

What It Does

Captures accurately at the point of work, simplifies the steps, integrates into business systems, and scales across every location.

What That Gets You

Reliable, standardized, trusted capture that cuts manual work and runs the same across the enterprise.

Models & Pricing

Two models. One platform.

N2040

Cat. 8019879

40 pages per minute

USB 3.2 + Gigabit Ethernet
6,000 daily duty cycle

\$595

US MSRP

N2050

Cat. 8019895

50 pages per minute

USB 3.2 + Gigabit Ethernet
8,000 daily duty cycle

\$895

US MSRP

US MSRP shown. USB Cable Included. Regional pricing varies; confirm the local pricing before quoting.

Three people. Three priorities.

Reliability

Front line

"Keep my queue moving."

Why It Matters

First-time accuracy moves the work forward, not back into the queue [the patient to care, the claim to adjudication].

What's Behind It

- Perfect Page
- SurePath feeding
- Multi-feed recovery

Efficiency

Operations

"One standard that scales."

Why It Matters

Standard profiles land each record in the right place [chart, account file, case file] with no re-keying.

What's Behind It

- Network connectivity
- Smart Touch
- Capture Pro LE in the box

Trust

Leadership

"Outcomes I can defend."

Why It Matters

Defensible capture protects the metrics and the compliance position [HCAHPS, audit, chain of custody].

What's Behind It

- Secure Boot
- TLS 1.2 / HTTPS
- Digital stamping & audit logs

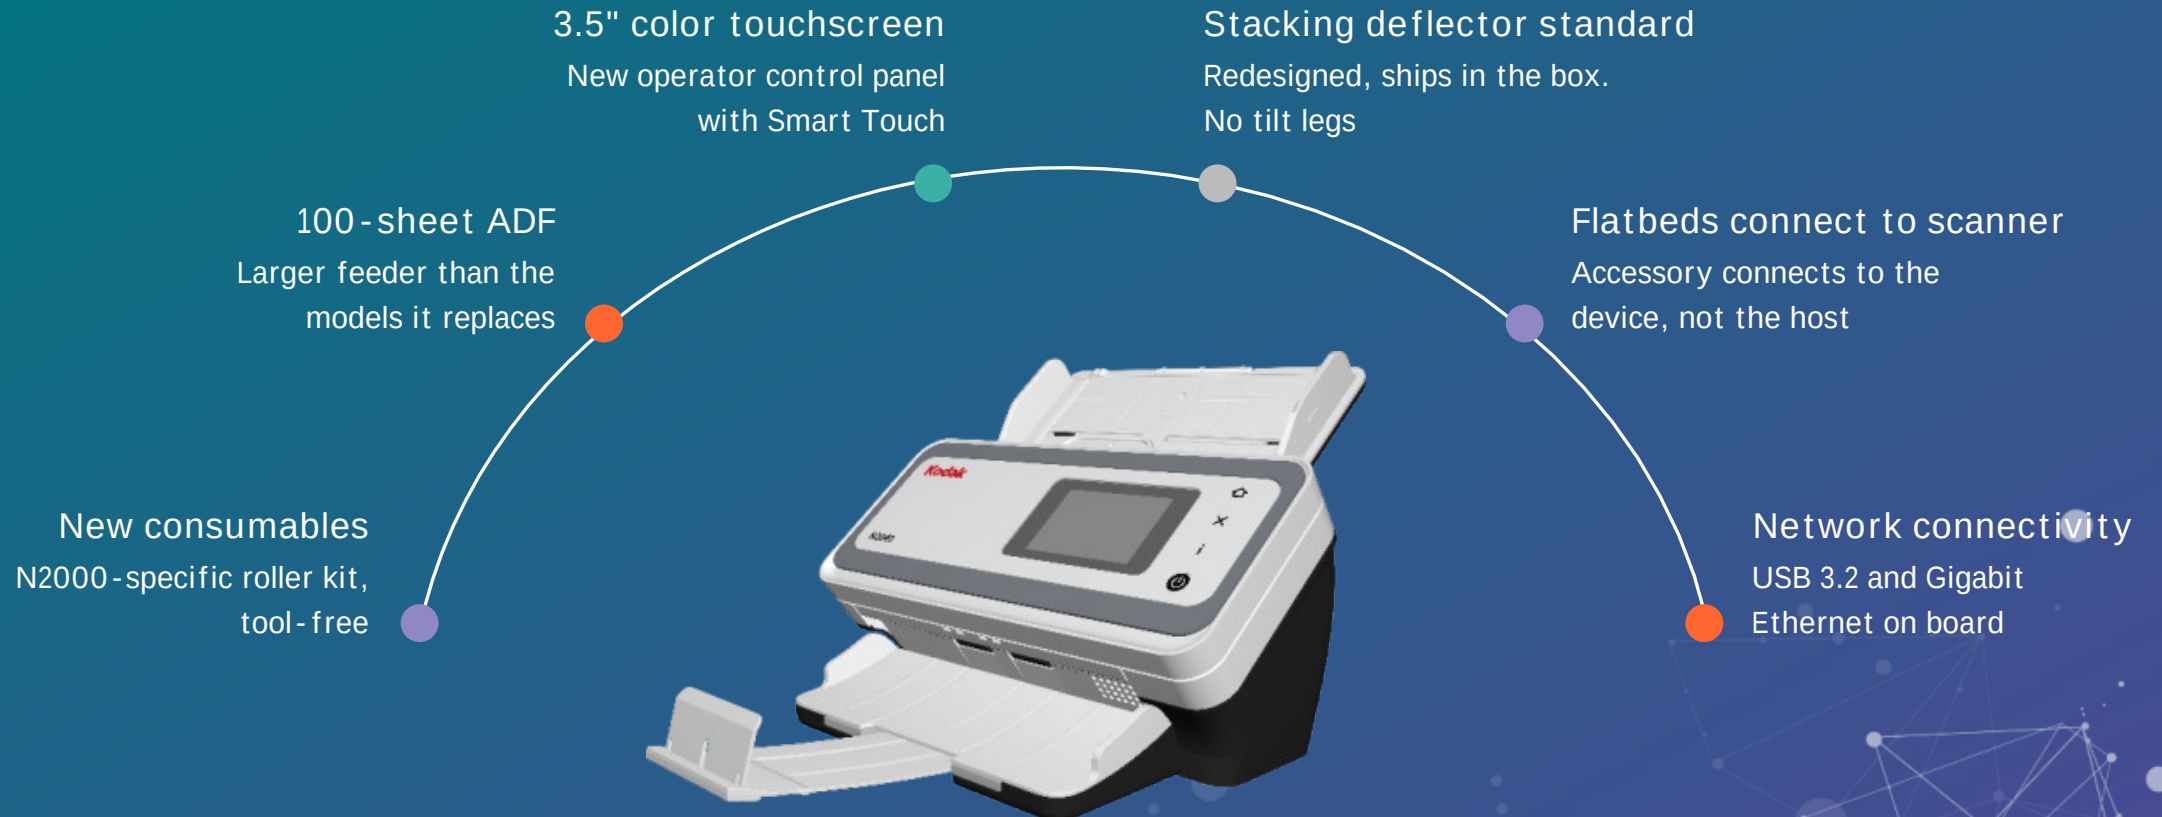

Verticals Banking & financial services · Healthcare · Insurance · Government · Legal · BPO / back office

A woman with long brown hair and glasses is smiling while using a tablet. She is wearing a light blue button-down shirt. The background is a blurred office environment with other people. A teal overlay covers the left side of the image, and a network diagram is visible in the bottom right corner.

02

Hardware highlights

Built Around What's New

SurePath paper handling

Reliable feeding for mixed, fragile, and difficult documents, so batches virtually finish on the first pass and originals stay intact.

Wide media handling

Light paper to thick stock and hard cards, so the exception documents stay on one device.

Ultrasonic multi-feed detection

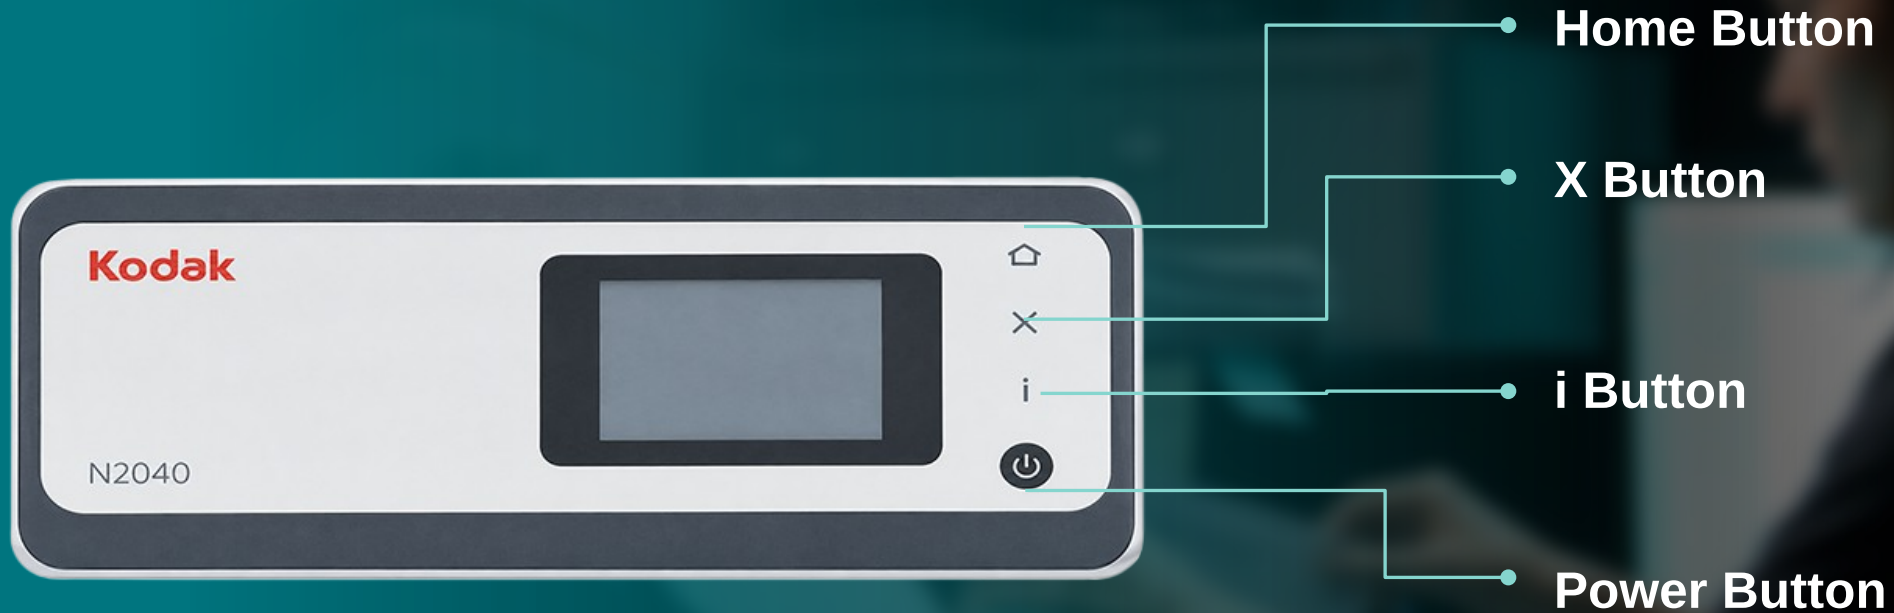

A low-frequency UDDS sensor catches double-feeds the instant they happen, with no calibration step.

Output stacking

The redesigned stacking deflector ships standard and keeps scanned documents neatly ordered.

The 3.5" touchscreen OCP

OCP

19 OCP and application languages, including SmartTouch and Capture Pro

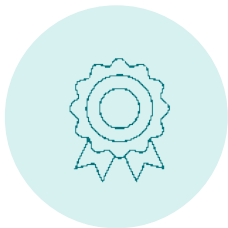

Why it matters

Improved UX with 3.5" touchscreen OCP compared to 7-segment screen. A high-end user experience on an entry-level device.

Ultrasonic multifeed detection

The N2000 Series uses a low-frequency UDDS sensor to catch a double-feed the instant it happens, with no calibration step for the operator.

	E1000	N2000	S2000
Sensor frequency	High	Low	Low
Calibration required	No	No	Yes

Why it matters

No calibration means one less setup step and one less thing to get wrong in the field, with interactive recovery when a double-feed is caught.

A man and a woman are sitting at a dark table in a modern office. The woman, on the left, has dark hair in a ponytail and is wearing a blue and white striped shirt. She is smiling and looking at a laptop. The man, on the right, has a beard and glasses, is wearing a dark blue sweater, and is also smiling while looking at the laptop. He is holding a pen in his right hand. The background is a blurred office interior with large windows and a hanging lamp. The overall tone is professional and collaborative.

03

Driver & software highlights

Hardware & Software Requirements

Supported Operating Systems

- Windows 10 (32 & 64-bit)
- Windows 11
- Windows Server 2016 LTSC (64-bit)
- Windows Server 2019 LTSC (64-bit)
- Windows Server 2022 LTSC (64-bit)
- Ubuntu 64-bit 18.04 / 20.04 / 22.04 / 24.04

Recommended PC Configuration

Processor	i5 (Gen 12), 2.5 GHz
Memory	8 GB RAM
Storage	500 GB (SSD recommended)

Perfect Page Features

Cleaner images at smaller file sizes, which improve OCR and cut rework downstream.

Cleanup

- ✓ Deskew
- ✓ Cropping
(auto, fixed, relative)
- ✓ Auto-orientation
(multi-lingual)
- ✓ Orthogonal rotation
(auto-orthogonal mode)
- ✓ Add / remove borders
- ✓ Image edge fill
- ✓ Streak detection & removal
- ✓ Hole fill
- ✓ Background color smoothing
- ✓ Blank image detection

Color & Tone

- ✓ Auto color detect
- ✓ Color balance
- ✓ Sharpening
- ✓ Brightness / contrast control
(including auto-adjust)
- ✓ Binarization
(Fixed, IT2, ATP)
- ✓ Electronic color dropout
- ✓ Multi-color dropout
- ✓ Binary filter
(halftone removal)
- ✓ Foreground boldness

Document Handling

- ✓ Dual-stream scanning
- ✓ Image merge
- ✓ Split document (+ length)
- ✓ Snap to size
- ✓ Normalize for flatbeds
- ✓ Long document mode (120")
- ✓ Photo segmentation
- ✓ Image order
- ✓ ADF Sleeve Document
- ✓ ADF Sleeve Document: MUDL
- ✓ Flatbed Document: MUDL

Data & Compliance

- ✓ Digital stamping
- ✓ Barcode reading (up to 6)
- ✓ JPEG compression
- ✓ Binary filters
(lone pixel, majority rule)
- ✓ 12 resolutions to 1200 dpi

Admin control & platform security

Admin Password

Modern requirements, aligned with the S5000 Series: at least 8 characters and three of four categories — upper case, lower case, number, special character.

Behind The Password

- ✓ Network
- ✓ Easy Setup
- ✓ Power settings
- ✓ Language
- ✓ Sharing

Not Gated

- ✓ Maintenance
- ✓ Diagnostics
- ✓ Reset

Platform Security

Secure Boot

Signed firmware only, SHA-512 / RSA-4096

Encrypted connections

TLS 1.2 and HTTPS

Locked firmware

No firmware alterations supported, only trusted Kodak Alaris firmware runs

A photograph of two women in a modern office environment. The woman on the left, with long grey hair, is wearing a white and black striped long-sleeved shirt and dark blue trousers. She is looking towards the woman on the right. The woman on the right, with dark curly hair, is wearing a black top and is smiling while holding a tablet. The background features a light-colored textured wall and a wooden door frame. A teal gradient overlay covers the left side of the image, and a white geometric line pattern is visible on the right side.

04

Accessories & consumables

Consumables

One Roller Kit, Tool-free Maintenance

Product ID 8021560

KODAK N2000 Series Roller Kit

The feeder consumables kit for the N2000 Series is different from the E1000 and S2000 kits. Tool-free to replace.

Why it matters: We are taking the N2000 Series to wider and lighter media.

Shared with the E1000 / S2000 line

US list pricing. Regional pricing varies.

KODAK Passport
Flatbed Accessory

\$500

KODAK Integrated
A4 / Legal Flatbed

\$500

KODAK Carrier
Sleeves

\$50

Why this matters: We are expanding the media range in a smaller footprint to increase flexibility for exception documents.

Track record

Why Kodak Alaris

01. | More than 30 years as the document-of-record imaging standard buyers already trust.

02. | Durable, serviceable, high-duty engineering with tool-free consumables.

03. | Proven across banking, healthcare, government, insurance, and back office.

04. | A capture portfolio and support footprint rivals in this class cannot match.

Localize by region

Service and support

Advanced unit replacement

Remote support first. If it cannot be solved remotely, a replacement ships to you, as early as the next business day.

Shipping covered

Shipping both ways is covered under an active agreement.

Professional Services

Available Onsite installation or workflow optimization.

Included warranty: Standard terms to be confirmed by region

Your decision

Why change. Why now. Why Kodak Alaris.

Why change

Without one standard, capture workflows drift site to site. Rework, rescans, and audit exposure grow with every quarter.

Why now

Every quarter of waiting is a tax you keep paying, in labor, cycle time, and risk.

Why Kodak Alaris

More than 30 years as the document-of-record standard, proven in your market, with capture that holds up under audit.

Next step

Let us prove it on your documents. Book a pilot or a live demo.

APPENDICES

APPENDIX A – Easy Setup

One standard. Every site.

Capture as a fleet strategy, not a device-by-device rollout.

The problem: Scanners bought and configured one unit at a time drift site to site: you end up with inconsistent settings, rework, delays, and audit gaps as the fleet grows.

One locked configuration

One EasySetup sheet carries the network connection settings and admin password, so every scanner joins the network the same way.

Ship straight from stock

Any user can connect a scanner out of the box. IT installs drivers and capture profiles remotely, with no desk visit.

Same-day rollout

Turn a multi-week deployment into a same-day task. For highly secured networks, the MAC-address is provided so that authorization can be set up in advance..

The Value Wedge: True network deployment in distributed capture; where most competitors in this class are still USB-only.

Three steps, one configuration

01

Create once

An admin sets the network choices at easysetup.kodakalaris.com. Set wired, DHCP or static, sharing, and power — then generate the EasySetup PDF.

02

Scan the sheet

Print or e-mail the PDF, then scan it at the scanner's control panel. The page carries the settings as a secure QR code; not an image.

03

Self-configures

The scanner reads the QR code and applies its own network settings; identical across every unit and site.

Self-Contained

Choices go only into the QR sheet — nothing is stored or sent to a server.

Access controlled

Sets the admin password in the scanner when the sheet is scanned; EasySetup mode can be disabled.

Fleet or Single Unit

Apply one sheet to any scanner or target a specific serial number.

The output: one secure sheet

QR code is not human-readable — print or e-mail it, scan at the scanner to configure.
