

neat.frame

A beautiful way to meet.

Neat Frame is a first of its kind portrait-oriented all-in-one video device for Zoom and Microsoft Teams that fits anywhere. Purposefully designed to cater for the multiple new workstyles and spaces companies and employees are now adopting, it's a super convenient touch screen device not only attractive for working from home or any office but also hot desking, jump rooms, retail environments or as a virtual receptionist and all manner of other new and exciting applications.

Space-saving device

Neat Frame's incredibly simple to set up and use, offers superior audio-visual quality and frees up your laptop or desktop computer for work, making meetings feel like less of a juggle between talking, listening and shuffling windows of various content. In other words, it declutters your PC layout, as well as your desk or similar work surfaces.

Better still, Neat Frame has all the functionality of large-scale corporate solutions, yet its relatively small footprint takes up little space. In addition, a subtly integrated handle at the back enables you to easily move Neat Frame from room to room, depending on your individual needs or preferences.

Look, feel and be at your best

With its perfectly placed high-resolution wide-angle camera, Neat Frame guarantees direct eye-level communication for more natural and immersive interaction. Besides that, its bright digital display provides crystal clear imagery in a wide variety of settings, so you can rest assured the device will always present you and others in beautiful and elaborate detail. As a result, Neat Frame offers you the opportunity to always look, feel and be at your best, however or wherever you choose to meet or interact. At the same time, it gives you an optimized layout of people and content with touch control, bringing both to the forefront by filling more of the screen and reducing any wasted black areas.

More audio, less distractions

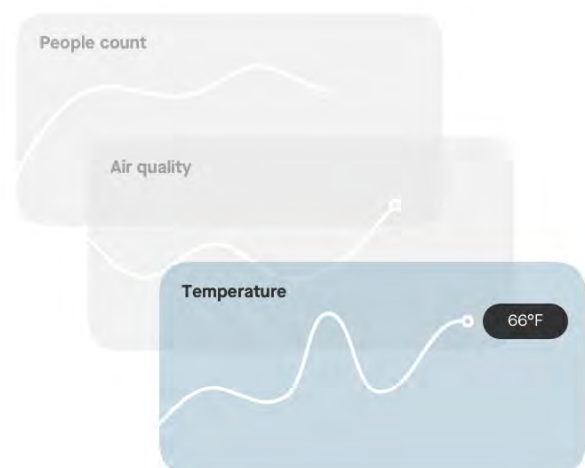

Neat Frame incorporates advanced audio capabilities too that enhance vocal pickup and remove or lessen any exterior noise. For example, our patent-pending Neat Bubble suppresses all sounds outside of the camera view. Essentially, what people see is what they hear. So, when you're sitting or standing within sight, they'll be able to quickly grasp what you're saying without the distraction of any peripheral noise or activities happening around you. That includes you typing on your keyboard or pouring yourself a coffee, etc. It also eliminates any garbled 'double-talk' issues where two people talk at once, so your conversations can flow more naturally.

Healthier, happier, securer meetings

Health and happiness-wise, Neat Frame instinctively frames and follows your movements, meaning you can stand up to stretch your legs or freely move around for better wellbeing while entirely absorbed in your meeting. Subsequently, you stay more energized, focused and productive for longer, boosting company ability and turnover. Finally, Neat removes complexities and threats thanks to our secure, single-purpose hardware devices. Hence, no stressing about passwords and patches. Plus, you can install all the latest upgrades with just one click.

Safer meeting rooms

Thanks to Neat Sense, Neat devices enable companies to offer significant health benefits to their employees, which in today's new normal of having to take ever-increasing protective measures against COVID-19 can be a huge relief. Neat Sense helps you control and monitor air quality, humidity (healthy indoor humidity levels are between 30-50%. Flu viruses can spread quickly due to poor indoor humidity), CO2 and organic chemical levels in the room – scents, odors, etc. Also, whether or not there are people in a room and if so, how many. That way, you can be sure of maintaining safe social distancing at all times.

Neat Frame

Two-way loudspeaker system with minimal distortion
1 tracking mic
3 microphones angled in an end-fire array
Support for wired and wireless headphones
Hardware accelerated audio processing
Beamforming
Echo cancellation
Noise suppression
Automatic gain control
Dereverberation

Security lock slot
Secure boot
The Zoom Rooms app is secured with App Lock Code
Communications are established with 256-bit TLS encryption
Shared content is encrypted with AES-256 encryption
As a native Zoom device Neat Frame supports all Zoom signaling and media encryption protocols.

Built-in power supply
100 - 240 V AC, 50 Hz to 60 Hz
Ambient operating temperature: 32° to 95° F
(0° - 35° C)
Storage temperature: 5° - 149° F (-15° - 65° C)
Relative humidity: 20% to 80%
Network standby: 8W

8x digital zoom
50MP capture resolution
113° horizontal field of view
Automatic people framing
Hardware accelerated video encode and decode
Distortion correction
Noise reduction
Chromatic aberration correction
Automatic white balance and color correction
People video resolution: Up to 1080p / 30
Content video resolution: 720p / 60, 1080p / 30
