

Stylus

00125115 "Scribble" Tablet Stylus for Apple iPads, High Precision, Tilt Recognition

Highlighttext:

- Productive creativity with the stylus for the iPad: write, sketch and illustrate on Apple iPads as precisely, intuitively and naturally as with a real pen thanks to this pixel-accurate drawing stylus
- Supports the iPad Scribble function: conveniently and easily fill in notes, search fields, etc. by handwriting - Scribble converts it into typed text so that no keyboard is needed for typing
- Thick and thin: the intelligent stylus tip recognises changes in tilt, so you can use thick and thin lines with different angles, shade and create other effects with the stylus
- Comfortable writing, drawing and note-making: simply take your hand off since palm rejection technology built into the iPad recognises the palm, ensuring no functions are triggered when the device is let go
- All day long: with 12 hours of battery life, you can give free rein to your creativity on the Apple iPad
- Always ready for your ideas: tablet stylus grips magnetically to virtually all Apple iPads and is therefore immediately ready to hand
- Thanks to low latency, the iPad stylus can be used as naturally as on paper
- Switch on and go: press the On button and the tablet stylus is instantly ready for use with the Apple iPad; no complex Bluetooth pairing required
- High compatibility: no matter what app you use to paint, write, sketch or sign - the stylus for the iPad can work with virtually all apps, no specialist apps are needed
- Charge and use: charge the touch pen via the USB-C cable on the iPad and carry on using while it charges
- Energy-saving: after 5 minutes of non-use, the input stylus switches itself off automatically
- Advantage over finger swiping: the pointed end of the drawing pen simulates an electrical field, which allows high-precision input and supports the tablet's palm rejection function designed to avoid unpleasant fingerprints on the display

System Requirements:

- Operating system: iPad OS 14 or later (for Scribble function)

Technical characteristics:

- Colour: White
- Shade of colour: White
- Model: For Capacitive Display
- Length: 165 mm
- Recommended Use: Tablet

Delivery:

- 1 "Scribble" stylus
- 1 USB-C cable
- 1 instruction manual
