

USB RS232 Converter w/ COM Port Retention

No.: 42686

Description

- Allows a USB equipped computer to connect to 9 Way Serial RS-232 devices
- Built-in COM Port Retention feature allows COM port settings to be stored within the adapter, so there's no need for any software reconfiguration if the adapter is plugged into a different USB port on the same computer
- Supports asynchronous serial interfaces, wake-up and remote power management
- Cable length: 1.1m
- 2 Year Warranty

Thanks to COM Port Retention technology once the USB to Serial Adapter has been installed and configured it can be disconnected from the computer and reconnected to any available USB port on that computer at any time without having to reconfigure your software, saving you time and frustration.
