## LED Monitor Light

Article number: 4623796

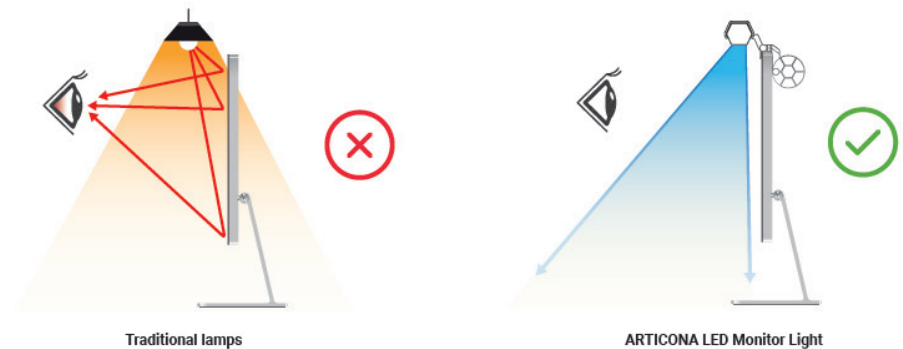

The ARTICONA LED Monitor Light provides optimal and individually adaptable lighting for your workplace. It saves space because it illuminates the desk from the screen. It does not cause reflections that limit the visual function, such as those produced by conventional lamps, which is achieved by only illuminating the work area in front of the monitor at an angle of 120 degrees. The lamp can be attached to any monitor or laptop and impresses with its modern and elegant design in matt black. Both brightness and colour temperature can be adjusted individually according to your needs using a simple touch operation which is also saved thanks to the practical memory function. For example, it is advisable to choose a neutral white for concentrated work. Cold white light also enhances concentration and is particularly suitable for tasks that require a lot of creativity and attention. Warm white light, on the other hand, has a more cozy and relaxing effect. The lamp is quiet, so you can work with concentration. The monitor lamp is plug-and-play and requires just simple installation. It holds securely to the monitor and has a recess in the middle, for example for an integrated webcam. But it can also be easily used next to an external additionally attached webcam. Power is supplied via an enclosed cable via computer or notebook (USB-C to USB-A). For this reason, a power supply unit is not supplied. The monitor light is not only convincing in terms of design and function, its energy efficiency is also impressive and is a sensible addition to a modern workplace.

Bechtle Logistik & Service GmbH  
Bechtle Platz 1 | 74172 Neckarsulm | Deutschland

- Control via touch panel
- Brightness 2800 – 3200 K / 454,9 lm, 4000 – 4500 K / 351,4 lm, 6000 – 6500 K / 461,5 lm (highest brightness therefore 461.5 lm)
- Dimmable brightness 10 % - 100 % (10 levels)
- Flexible colour temperature: warm white (2800 – 3200 K), natural white (4000 – 4500 K) or cold white (6000 – 6500 K)
- 66 LEDs (33 warm white and 33 white)
- Memory function
- Plug and play
- Wired (cable with the USB-C to USB-A connections included)
- Beam angle: 120 degrees

## Specifications

Product Type	Lamp
Application	PC/Notebook
Input Voltage	DC 5 V
Input Port	Type-C
Power	4 W
Energy efficiency Class 2021	Class D
luminous flux	461.5 LM
Light colour	Cold white, natural white, warm white
Dimmable	Yes
LED type	SMD 2835
Energy efficiency Class Area	A-G*
Material	Aluminium + ABS
Colour	Matte black
Dimensions (L x W x H)	400 x 24 x 20 mm
Weight	500 g
Cable length	1.55 m
Special features	Low-noise, touch-enabled, memory function

\* Since September 1, 2021, there has been a new EU energy label for light sources, which now ranges from A to G instead of A++ to E. You can get more information via the QR code on the energy label.
