

Ignite visual thinking with MindManager Enterprise

Uplevel your team with dynamic visual diagrams, mind maps, flowcharts, and timelines. Get streamlined deployment with volume license discounts, a robust IT administrator portal, and optional consulting services.

Unlock greater efficiency and collaboration for your teams

Accelerate workflows

Collaborate asynchronously or in real-time, fostering understanding, alignment, and agreement. Transform dynamic brainstorms into actionable strategies during team sessions. Store and distribute maps across leading cloud storage providers or with MindManager Files, which eliminates the need for third-party storage.

Develop plans

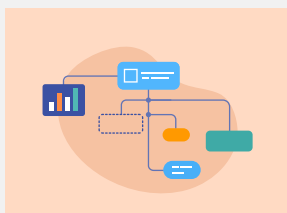

Sidestep project pitfalls with advanced tools for cohesive team alignment. Streamline scope, requirements, and progress tracking in a transparent system. Gain comprehensive project insights through resource, task, timeline, kanban, and Gantt views. Seamlessly balance overarching goals with crucial details.

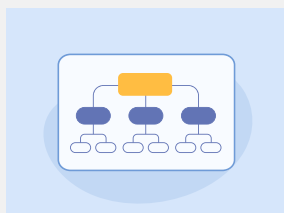

Unify knowledge

Boost team efficiency with Jira, Microsoft 365, and 800+ app integrations through Zapier, streamlining operations and enhancing accuracy. Access and visualize data from multiple sources on one dashboard. Manage extensive information. Create shareable knowledge repositories by linking files and notes.
