

# WHOEVER SAID SKY IS THE LIMIT?

## Your shots are about to take off

One for the creators; 50 MP AF selfies with eye-tracking, 108MP Hybrid OIS main camera, 50MP Telephoto for 4x zoom and 13MP UW for the perfect 0.5x selfies or landscapes. Throw in things like Selfie Gestures, Capture Fusion and 50mm portraits, you'll be in creator mode in no time.

## Just pop the hood and fix it yourself<sup>1</sup>

Most of us know the feeling of dropping a phone and cracking the screen. With HMD Skyline, it's not that big of a deal. Its Gen2 repairability basically means that you can just pop off the back cover and you're in. Best of all, the phone looks like it comes from a catwalk with its stunning, and smart design.

## Now with Detox Mode

We can't turn off all the background noise in your life but we can help you hit pause and take a moment. Activate the Digital Detox Mode to disable the visibility of your social apps. Don't worry, they'll be there when you turn the mode off. Until then, enjoy some time in the real world. We've also added a touch more zen to the rest of your Android™. The Balance Interface, has a few things moved around to make finding them easier. It even sounds more chill with alarms, notification sounds and ringtones that won't have you jumping out of your skin.

## The Custom Button

Make your phone more "you" with the Custom Button. You can set it up so that it does one thing when you hold it, and another thing when you double-press it. It's your shortcut to your favourite game, navigating home, asking the AI-powered assistant of your choice weird questions, and more.

Colours:  Neon Pink  Twisted Black

# HMD SKYLINE

## Sales package contents:

- Device
- SIM pin
- USB Type-C™ to Type-C cable
- Quick Start guide
- Safety Booklet

## Product specifications:

<sup>1</sup>Self-repair support available through iFixit in select markets. Details available at <https://www.hmd.com/self-repair> <sup>2</sup>5G coverage is limited and might not be supported by your network service provider. Actual speed depends on network and other factors. <sup>3</sup>Pre-installed system software and apps use a significant part of memory space. <sup>4</sup>Battery has limited recharge cycles and battery capacity reduces over time. Eventually the battery may need to be replaced. <sup>5</sup>Battery has been tested by HMD Global to maintain at least 80% of its original capacity after 800 full charging cycles. <sup>6</sup>Battery testing was conducted by HMD Global Oy using a real-life usage test. Testing included cycles combining 30 minutes of active usage and 2 hours of idle time with a new battery, starting from 100% battery charge until the device powered off. Usage included e.g., gaming, video streaming, video playback, calling, browsing, and data transfer. Testing was conducted with normal device settings in a lit indoor environment.
