Handshake 3-Mode Vertical Mouse

**Bakker Elkhuizen**

The Handshake Mouse is a basic vertical mouse available for left- and right-handed users.

Ergonomically familiar. Technically refined.

The Handshake Mouse allows you to work with your arm and wrist in a neutral position, preventing physical discomfort. The Handshake Mouse offers a natural hand position and is equipped with additional features for greater ease of use. The DPI button allows you to switch effortlessly between different cursor speeds so you always have the right precision for your work. The handy back and forward buttons make navigating web pages and documents faster and more intuitive. You can also connect easily via Bluetooth, with a dongle, or wired when charging!

Ergonomic background

Prolonged use of a traditional mouse can lead to pain and discomfort in the shoulders, forearms, and hands (Chang et al., 2007 & Andersen et al., 2008). The 'handshake' position of vertical mice means that the wrist bends less to the side and the forearm does not have to turn inwards as much (Schmid et al., 2015). This results in lower muscle activity in the forearm than with a traditional mouse (Quemelo & Vieira, 2013). Vertical mice therefore lead to a healthier and more comfortable way of working compared to traditional mice.
