Digital Allround Terminal DAT 1000.

Multifunctional terminal for your safety.

The "DAT 1000" is a multifunctional information terminal with disinfection module developed by PSB GmbH - a company of the Bechtle Group - in Dreieich together with SMB Schnekenburger GmbH in Bad Dürrheim, which can be tailored to your individual requirements. The integration of your CI (logo and / or color design) is possible on request.

Multifunctional thanks to interchangeable application modules.
If the integrated disinfection module is no longer required, you can subsequently use another available module, such as a barcode scanner module. We are ready to replace this for an additional charge on request. It is also possible to develop a module according to your specification.

The multifunctional system for:
▮ Reception area
▮ Hotel and catering
▮ Exhibition and event halls
▮ Healthcare
▮ Retail and supermarkets
▮ Manufacturing

Options for a flexible use:
▮ Hand disinfection
▮ Print function of e.g. guest or customer cards
▮ RFID / barcode card issuance
▮ RFID / barcode scanner e.g. as access control
▮ Waiting number output

The DAT 1000 is produced in Germany.
