Logitech® Wireless Mouse M705

Logitech® Wireless Mouse M705 lets you power on... and on. It uses far less power than comparable wireless mice from other companies, so you'll go up to three full years between battery changes*. And it uses a tiny wireless receiver that stays plugged in to your computer, so your mouse is ready to go – whenever, wherever and for as long as it takes. Plus, hyper-fast scrolling means you'll fly through long documents to find what you need in a flash. Laser tracking means you'll get smooth, responsive cursor control. And the sculpted, right-hand shape means you'll be as comfortable finishing up as you were getting started. * Battery life may vary depending on your use.

Feature

Logitech® Wireless Mouse M705

Run for years

- Three-year battery life*
- Hyper-fast scrolling
- Tiny Logitech® Unifying receiver stays in your laptop

* Battery life may vary based on your use.

Three-year battery life* * Battery life may vary depending on your use.

Click more. Scroll more. Do more. Logitech® Wireless Mouse M705 uses far less power than comparable wireless mice from other companies. That means you can go up to three full years between battery changes*. * Battery life may vary depending on your use.

Hyper-fast scrolling

Hyper-fast scrolling lets you fly through long documents and Web pages with a single spin of a nearly frictionless metal scroll wheel.

Designed for control

The sculpted, right-hand shape guides your hand to a naturally comfortable position and places customisable control within your reach. Three thumb buttons lets you move quickly between Web pages or applications**. ** Requires software installation.

Logitech® Unifying receiver

The tiny Logitech® Unifying receiver stays in your laptop. There's no need to unplug it when you move around, so there's less worry of it being broken or lost. And you can easily add compatible wireless mice and keyboards to the same wireless receiver.
