

Smartsheet Enterprise Plan

The Smartsheet platform allows you to collaborate, manage, and report on work in real time, automate workflows, and deploy new processes at scale. Smartsheet is more than a productivity or task app, it's the end-to-end work execution platform with the proven power to help your organization achieve more.

Recognized as a leader and innovator by industry analysts — and our customers — Smartsheet combines enterprise-grade security and capabilities with an intuitive user interface. Smartsheet enables organizations to eliminate silos, make better decisions based on real-time data, automate workflows, and execute at scale.

We understand the complex needs of today's growing enterprise organizations. As Smartsheet usage expands within your organization, so too will your needs. That's why we built a secure and flexible work execution platform that business professionals can easily use — and that IT can easily implement and manage.

The Smartsheet Enterprise Plan is ideal for organizations requiring the ability to secure data and centralize administration of the plan, maximize user onboarding with self-guided training, and accelerate Smartsheet effectiveness with access to add-ons, support, and services.

Enterprise Plan features

The Smartsheet Enterprise Plan is the perfect option for a larger organization looking for increased security and administration oversight. Starting with a minimum of 25 licenses, you can enjoy all the functionality of the Business Plan, plus:

Unlimited Sheets

Users can create, edit, and share unlimited sheets.

Single sign-on (SSO)

Your users will securely access Smartsheet by leveraging their existing corporate security credentials.

Directory Integration

Leverage Microsoft Azure Active Directory to provision and deprovision users in Smartsheet. Synchronize users and their corporate metadata, including: division, department and cost center.

Chargeback report

Obtain a report based on your user's division, department, or cost center, drawing from data synchronized via Directory Integration.

Approved domain sharing

Allow your users to share only with the domains you whitelist.

Configurable account options for file storage

Control which online file storage systems your users can access.

Customized user experience

You can customize what your users see on the help, upgrade, and welcome screens.

Automate adding users

Ensure that all users on your domain are under organizational enterprise control with User Auto Provisioning.

Standard support

- Free self-service help-library and online community.
- Phone-based support.
- Access to self-paced training in the Smartsheet Center of Excellence and Certification Exam.

Access to premium add-ons and support for additional purchase (not included in Enterprise Plan)

- Control Center, Accelerators, Event Reporting, Salesforce Connector, Jira Connector, Microsoft Dynamics 365 Connector, Data Uploader, Calendar App, DataMesh, Pivot App, Dynamic View, 10,000ft.
- Upgrade to Professional Support Package to gain access to Pro Desk.

“Once you use Smartsheet and you understand what it can do, it's amazing what the brain does. All of a sudden you're coming up with ideas that you never had before because you were paralyzed by the fact that you didn't have a system. It's not just that you're developing these systems that are very transformational and drive productivity, but that you as an individual now open yourself up to think totally differently. We're dreaming bigger than we ever have.”

— Ana Davis, Head of Health, Safety & Environment for Syngenta North America – Crop Protection
