

Slim NanoSaver® 2.0 Portable Keyed Laptop Lock

Part Number: K65025WW | UPC Code: 0 85896 65025 6

Portable
security that
won't get
in the way.

The latest laptops from HP, Lenovo and Asus increasingly feature the Kensington Nano Security Slot, offering all the security and benefits of the standard Kensington Security Slot™, yet 70% smaller. However, these ultra-thin devices may be so slim that while a standard cable lock will fit, the thickness of the lock can be greater than the laptop itself. This prevents the device from lying flat on a surface, making the keyboard and trackpad uncomfortable to use.

With connectivity ports placed closer and closer together, a standard lock can also block adjacent ports, compromising functionality. A redesigned version of the innovative Slim NanoSaver® Laptop Lock, the Slim NanoSaver® 2.0 Portable Keyed Laptop Lock features a smaller lock head, with the locking cleat positioned low and the key cylinder up high and out of the way. This careful sizing and positioning of components has created a premium locking solution that won't block ports and allows ultra-thin and 2-in-1 laptops with Nano lock slots to lie flat and stable.

A self-coiling carbon steel cable stretches up to 1.8m (6') and shrinks down to 76mm (3"), making this lock easily transportable. Strength tested and verified for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion and other environmental conditions, the lock is backed by a five-year limited warranty, so you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.

Features include:

- Easily transportable self-coiling carbon steel cable
- Slim profile won't block ports and allows laptop to lie flat and stable
- Verified and tested
- 5mm keying system
- Register & Retrieve™
- Five-year limited warranty

Slim NanoSaver® 2.0 Portable Keyed Laptop Lock

Part Number: K65025WW | UPC Code: 0 85896 65025 6

Self-Coiling Carbon Steel Cable

Easily transportable and cut-resistant, stretching up to 1.8m (6') and shrinking down to 76mm (3"). Protective sheathing helps keep attachment points such as desks and tables free from scratches.

Won't Block Ports: Allows Ultra-Thin & 2-in-1 Laptops to Lie Flat and Stable

Slim Nano lock head design won't interfere with I/O ports or raise the device off its surface.

Verified and Tested

Each Kensington lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance and mechanical resilience.

5mm Keying System

Common across all of Kensington's latest locks, so there's only one keying system to manage. Smaller key opening helps thwart picking attempts.

Register & Retrieve™

Kensington's online key registration program that allows for quick, secure and free key replacement if ever lost or stolen.

Five-Year Limited Warranty

Rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.

Strength Features – Portable Cable Locks

Locks designed and tested to withstand straight and side pull forces of more than 90kgf (200lbf).

Locks designed and tested to withstand side pull forces of more than 181kgf (400lbf).

Carbon steel cable resists cutting forces of more than 113kgf (250lbf). Sheathing cover offers security and greater mobility while protecting surfaces from scratches.

Cable rotation, lock attachment and lock tip rotation tested to 8,000 cycles.

Lock heads designed and tested to withstand extreme temperatures ranging from -30° to 65°C.

Lock body tested for materials structural integrity. (Drop damage, hard impact, vibrations and corrosion)
