Explore the differences between Confluence Cloud and Data Center to help assess your team's needs.
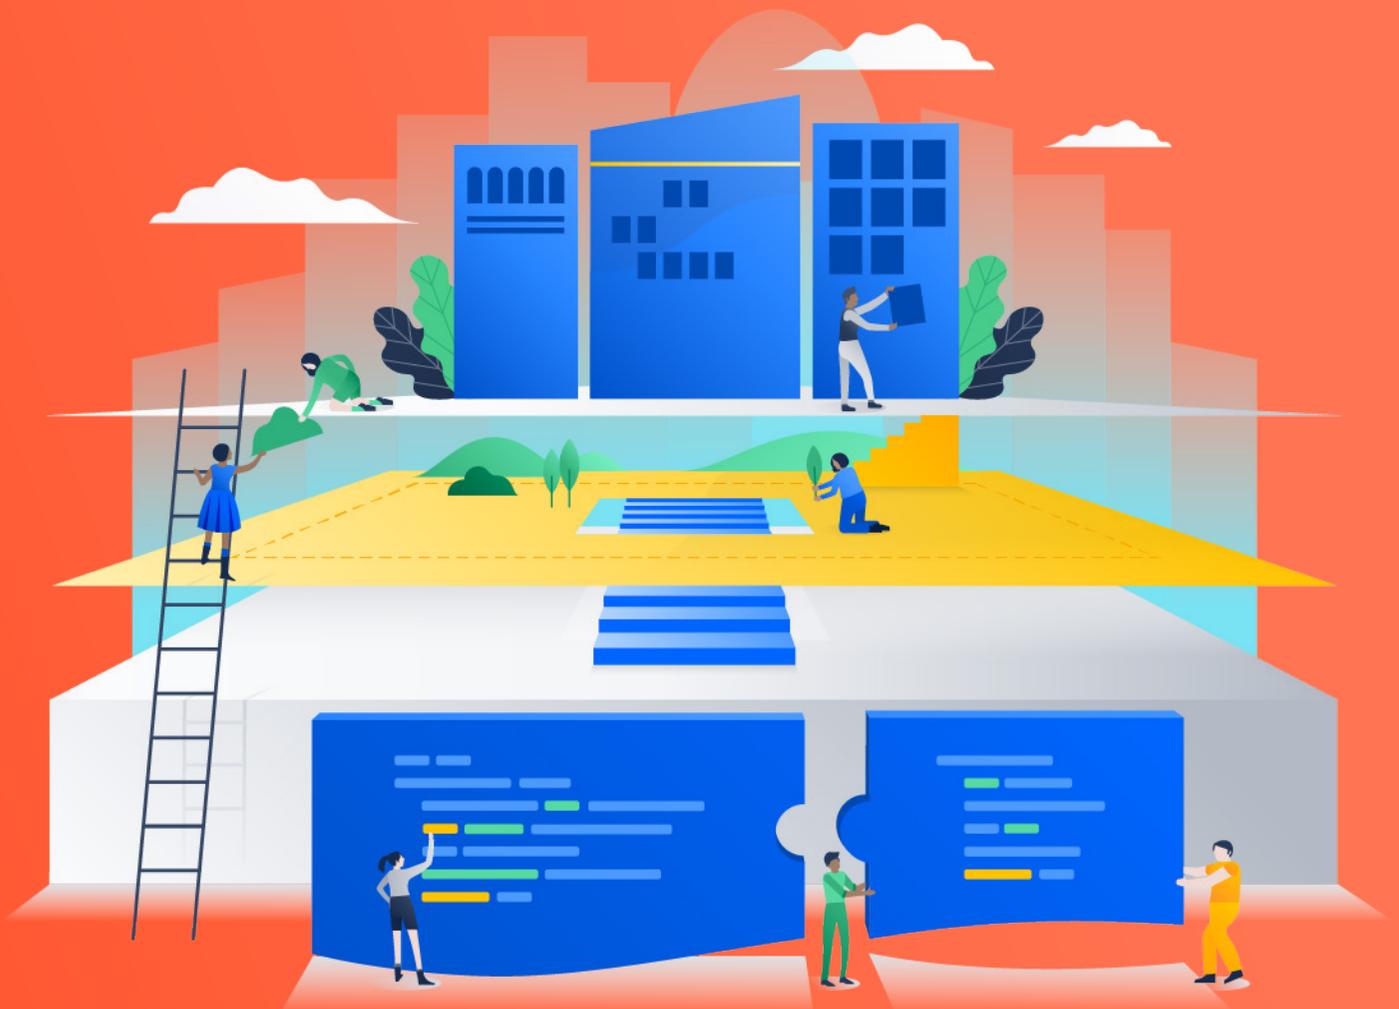

Get more with Confluence Cloud

Create, share, and collaborate with ease using the Confluence you know and love reimagined in the Cloud.

Simplified collaboration

Templates for every team
With 100+ templates in Cloud, we've got a template that's a perfect fit for your project.

Inline commenting and smart links
Editing and collaborating on the same page is easy with inline comments. Embed entire docs or videos on pages with just a URL.
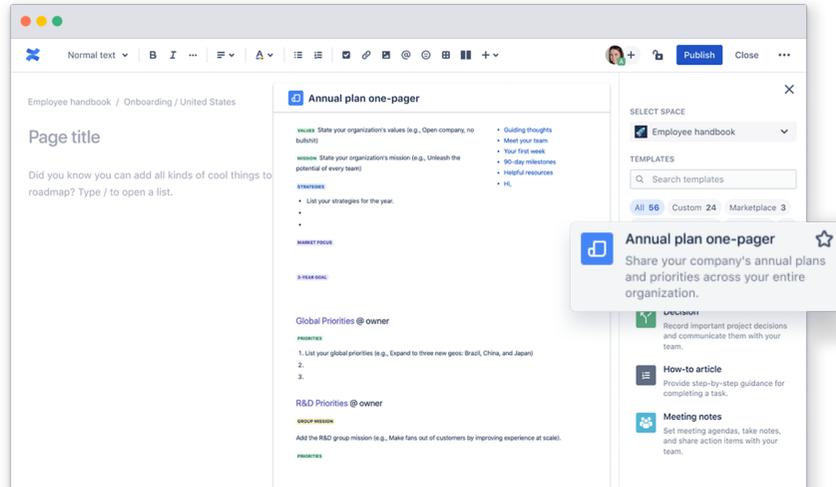

Confluence Cloud Editor

Make your work come to life
Confluence's new editor experience allows anyone to create beautiful, engaging pages effortlessly.

Fluid content creation
Insert live macros with slash commands to quickly add dynamic content such as Jira issues, action items for your team, due dates and more.
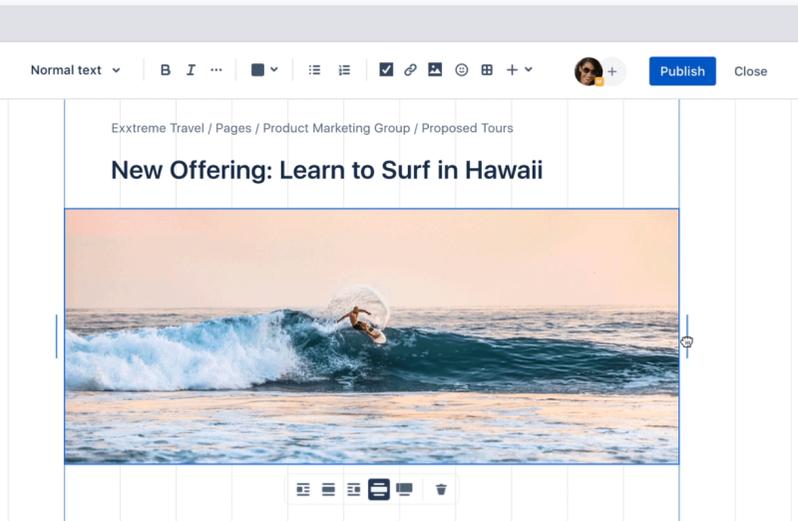

Contextual Create

Creation without friction
Quickly create a page or blog for any Space no matter where you are.

Flexibility right in the page tree
Creating, copying and editing pages can all be done directly in the page tree.

ATLASSIAN Confluence
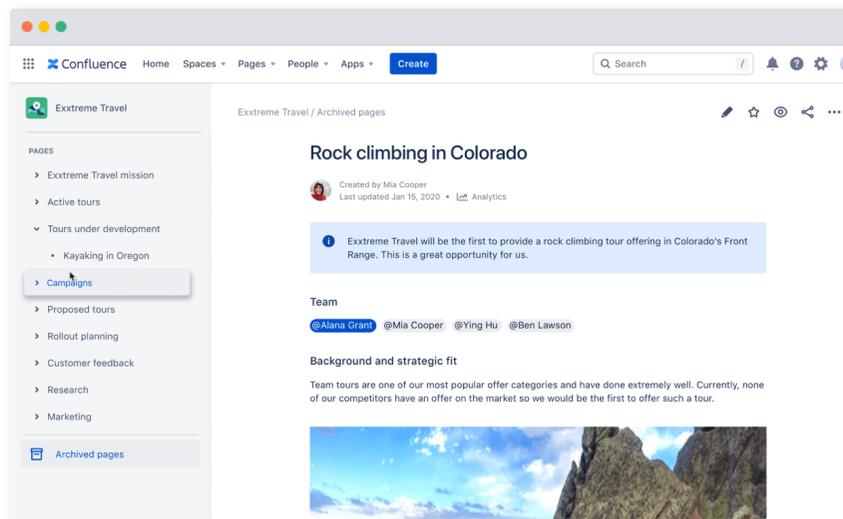

Compare features side by side

Get a high-level comparison for your deployment options, and find out how features
vary across Confluence Cloud and Data Center.

Cloud

Atlassian is all-in on a Cloud-first future to help your teams create, discuss, and complete work together.

- ✔ Win back valuable time for teams with smarter collaboration powered by machine learning, analytics, and more seamless integrations
- ✔ Reallocate infrastructure costs and IT resources to strategic business priorities.
- ✔ Get built-in security, privacy, compliance, and reliability.

Data Center

If you need to stay behind the firewall, you can host Jira Data Center on IaaS or on-premise.

- ✔ Continued investment in the areas of performance & scale, security & compliance, and infrastructure & operations.
- ✔ Flexible deployment options including on-premise, infrastructure as a service, and Kubernetes.
