mimecast™

Mimecast Managed Implementation.

Leave the implementation of your Mimecast solution to us and benefit from smooth operation!

With our Mimecast Managed Implementation service offering, we take the implementation process off your hands and get your Mimecast solution up and running quickly. Focus on your core business while we ensure effective adoption and seamless integration.

Our service offering includes the complete implementation and configuration of your Mimecast solution, customized to meet your unique requirements. We ensure that your email security, archiving, and compliance functions work optimally.

As part of our service offering, we will:

✅ Conduct an in-depth analysis of your current email infrastructure to identify the optimal configurations for your Mimecast solution.

✅ Ensure the implementation and integration of the Mimecast solution into your existing IT infrastructure.

✅ Support a seamless migration of your existing email data to the Mimecast archive.

✅ Support the establishment of security policies and filtering rules according to your requirements and compliance requirements.

✅ Provide training and best practices to train your employees on how to use the Mimecast solution and realize its full potential.

End-to-End Cloud Platform – Reduces Cost and Complexity

100% Availability of E-mails

Protects and sensitizes employees

Independent data storage and GDPR compliant
