USB-C- Lightning Cable 1m

Article number: 4624083

This ArticonA lightning cable consists partly of renewable raw materials. The sheath of the cable is made of 35% straw and 65% PLA. PLA, also known as polylactic acid, is a polyester based on renewable raw materials such as sugar cane or corn. The material, made of lactic acid molecules, is one of the biodegradable plastics, but rather on an industrial scale, which is most efficiently carried out in an industrial composting plant, which offers optimal conditions for degradation. With this ARTICONA lightning cable, we are participating in the circular economy through the proven use of renewable raw materials, as far as it is currently possible.

Charge or synchronise your iPhone, iPad, iPad mini, iPad Air or iPod touch with a USB compatible computer or USB charger.

- Lightning cable which is up to 90 % biodegradable / recyclable
- Outer jacket is made of renewable materials, 35 % straw and 65 % PLA
