Universal

PRODUCT DESCRIPTION

The compulocks Handgrip sets new standards for secure mobility solutions for Tablets.

This universal Tablet handgrip allows your mobile workers to "grab and go" with their Tablet. Our ergonomically shaped handle is connected to the tablet with high-performance adhesive and provides a comfortable grip with an adjustable strap. The handle allows 360-degree screen rotation between portrait and landscape format, providing the best user experience.

Due to the Docking Stand with quick release system, you can store your Tablet securely when it is not in use or place it at the Point of Sale or as an information terminal. The docking stand can be screwed or glued to the sales counter to provide a secure anchorage for this mobile Tablet solution.

Enjoy the perfect Grip & Dock experience when you use the rotation foot to swivel the docked Tablet.

FUNCTIONS

- Universal Tablet Safety Stand
