Optical Disc Drives

Creating easy back-ups and archives of all your important files

Optical discs continue to be the best format for storing important files for the long term. They are highly reliable, last for up to 100 years and are low cost – the perfect media for archiving precious documents.

Global government agencies believe so too. A recent report* states that due to higher sensitivity for data security, they are increasing their use of recordable optical discs for recording and storing important data.

Unfortunately, more and more notebook vendors choose to leave the optical drive out of their notebooks in favour of slim designs.

Verbatim has the solution with its range of slim and compact external Optical Disc Drives, allowing you to easily plug in and create back-ups of all your essential files. They could be your personal family pictures and videos or vital work documents – in fact, any files that you need to store safely and cannot afford to lose.

nero
Burn&Archive

Verbatim Blu-ray and DVD Writers include Nero Burn & Archive Software:

- CD, DVD, Blu-ray Disc™ burning software for all your videos, photos and precious documents.

- DiscSpan and SmartFit helps you to organise oversized files and archives among many discs - no need to split up files.

- SecurDisc Technology allows password protection to be added for extra security, and an electronic signature so that everyone knows you own the copyright.

- Nero MediaHome Standard brings all your media files together into a single location to help you easily organise and access all your photos, music, and videos. It helps you to burn the right playlist for any occasion; rip or copy your favorite CD; use different filters for the perfect photo; or put together slide shows – including photos, videos, and even film music in the background.

- Burn music videos directly onto audio CDs.

- Convert your audio CDs into the format of your choice - MP3, AAC, FLAC, or APE.

- Various streaming options, including the Nero Streaming Player App, allows you to show your movies, photos, slide shows, and other media files on various devices such as smartphones, tablets and Smart TVs.

- Relevant song titles, band names, and other details are automatically included.
