

Step by Step Instructions:

Step 1

Remove mounting tabs and bend to separate.

Step 2

Peel liner from tabs and place as shown (use as many tabs as you prefer).

Step 3

Slide the filter onto your screen, between the tabs...and you're done!

Tips for Optimizing Use

- Reduce glare by viewing your screen through the matte side.
- For higher clarity, switch to the glossy side.
- Remove and replace your filter as often as you like. But when it's on, it stays in place, even when laptop is closed!
